Directions (31–45): Record your answers in the space provided below each question.

- 31** A student predicted that all objects with a mass greater than 9 grams (g) will sink in water. After finding the masses of four objects, the student placed each object in a pan of water to determine if it would sink or float. The results of the experiment are shown in the data table below.

Data Table

Object	Mass (g)	Sank or Floated in Water
small rock	10 g	sank
wooden block	16 g	floated
iron nail	2 g	sank
plastic ball	1 g	floated

Evidence: _____

- 32** Students in a class take turns measuring the mass of the classroom pet bird. Each student fills out a record card for the bird's mass in grams (g). These record cards are shown below.

Date: 9/15
Mass of bird: 15 g

Date: 9/22
Mass of bird: 15 g

- The iron nail’s mass is less than 9 g and it sank.

Note: Do *not* allow credit for responses such as “wood floats” *or* “metal sinks” *or* “the wooden block floated.” These responses only refer to the material from which the object is made, and do *not* address mass, as stated in the hypothesis.

32 [1] Allow 1 credit for entering correct data in *all three* unshaded columns.

Example of a 1-credit response:

Date	9/8	9/15	9/22	9/29
