**Directions for Answering the
ELA Reading Practice Test Questions**

If you don't understand a question, ask your teacher to explain it to you. Your teacher has the answers to the practice test questions.

Read the passages “from *Bridge to Terabithia*” and “from *The Secret Garden*” and then answer Numbers 1 through 7.

Passage 1: from *Bridge to Terabithia*

by Katherine Paterson

In this excerpt from Bridge to Terabithia, a young boy remembers the first time he brought his best friend to a favorite place in the woods.

- 1 Terabithia was their secret, which was a good thing, for how could Jess have ever explained it to an outsider? Just walking down the hill toward the woods made something warm and liquid steal through his body. The closer he came to the dry creek bed and the crab apple tree rope the more he could feel the beating of his heart. He grabbed the end of the rope and swung out toward the other bank with a kind of wild exhilaration and landed gently on his feet, taller and stronger and wiser in that mysterious land.
- 2 Leslie’s favorite place besides the castle stronghold was the pine forest. There the trees grew so thick at the top that the sunshine was veiled. No low bush or grass could grow in that dim light, so the ground was carpeted with golden needles.
- 3 “I used to think this place was haunted,” Jess had confessed to Leslie the first afternoon he had revved up his courage to bring her there.
- 4 “Oh, but it is,” she said. “But you don’t have to be scared. It’s not haunted with evil things.”
- 5 “How do you know?”
- 6 “I can just feel it. Listen.”
- 7 At first he heard only the stillness. It was the stillness that had always frightened him before, but this time it was like the moment after Miss Edmunds finished a song, just after the chords hummed down to silence. Leslie was right. They stood there, not moving, not wanting the swish of dry needles beneath their feet to break the spell. Far away from their former world came the cry of geese heading southward.

8 Leslie took a deep breath. "This is not an ordinary place," she whispered. "Even the rulers of Terabithia come into it only at times of greatest sorrow or greatest joy. We must strive to keep it sacred. It would not do to disturb the Spirits."

9 He nodded, and without speaking, they went back to the creek bank where they shared together a solemn meal of crackers and dry fruit.

Passage 2: from *The Secret Garden*

by Frances Hodgson Burnett

10 She was standing inside the secret garden.

11 It was the sweetest, most mysterious-looking place any one could imagine. The high walls which shut it in were covered with the leafless stems of climbing roses which were so thick that they were matted together. Mary Lennox knew they were roses because she had seen a great many roses in India. All the ground was covered with grass of a wintry brown and out of it grew clumps of bushes which were surely rosebushes if they were alive. There were numbers of standard roses which had so spread their branches that they were like little trees. There were other trees in the garden, and one of the things which made the place look strangest and loveliest was that climbing roses had run all over them and here and there they had caught at each other or at a far-reaching branch and had crept from one tree to another and made lovely bridges of themselves. It was this hazy tangle from tree to tree which made it all look so mysterious. Mary had thought it must be different from other gardens which had not been left all by themselves so long; and indeed it was different from any other place she had ever seen in her life.

12 "How still it is!" she whispered. "How still!"

13 Then she waited a moment and listened at the stillness. The robin, who had flown to his treetop, was still as all the rest. He did not even flutter his wings; he sat without stirring, and looked at Mary.

14 "No wonder it is still," she whispered again. "I am the first person who has spoken in here for ten years."

FSA ELA Reading Practice Test Questions

- 15 She moved away from the door, stepping as softly as if she were afraid of awakening some one. She was glad that there was grass under her feet and that her steps made no sounds. She walked under one of the fairy-like gray arches between the trees and looked up at the sprays and tendrils which formed them. "I wonder if they are all quite dead," she said. "Is it all a quite dead garden? I wish it wasn't."
- 16 If she had been Ben Weatherstaff she could have told whether the wood was alive by looking at it, but she could only see that there were only gray or brown sprays and branches and none showed any signs of even a tiny leaf-bud anywhere.
- 17 But she was inside the wonderful garden and she could come through the door under the ivy any time and she felt as if she had found a world all her own.

Passage 1: Thomas Jefferson’s Vegetable Garden: A Thing Of Beauty And Science

by Graham Smith

This passage describes the gardens at Thomas Jefferson’s home, Monticello, and discusses the former president’s passion for gardening.

- 1 After Jefferson retired from public life to his beloved Virginia hilltop plantation, the garden “served as a sort of this experimental testing lab where he’d try new vegetables he sought out from around the globe,” says Peter Hatch, the estate’s head gardener. Hatch recently wrote a book about Jefferson’s garden and its history called *A Rich Spot of Earth*.
- 2 Somehow, the author of the Declaration of Independence and the nation’s third president found spare time to meticulously document his many trials and errors, growing over 300 varieties of more than 90 different plants. These included exotics like sesame, chickpeas, sea kale and salsify. They’re more commonly available now, but were rare for the region at the time. So were tomatoes and eggplant.
- 3 In the nearby South Orchard, he grew 130 varieties of fruit trees like peach, apple, fig and cherry. All the time, he carefully documented planting procedures, spacings of rows, when blossoms appeared, and when the food should come to the table. Behind Jefferson’s “zeal to categorize the world around him” was a patriotic mission, Hatch says.
- 4 Jefferson wrote, “The greatest service which can be rendered any country is to add a useful plant to its culture.” . . .
- 5 Lots of things failed in the garden. His entries from 1809 show the carrots, beets, sorrel and okra, the cauliflower, tarragon and Chinese melons missing the mark. Jefferson cites Windsor Beans as “killed by bug” and notes on Aug. 21: “From the 7th of Apr. to this day, excessive drought and cold. Now a good rain.”
- 6 Hatch gives some hope to home gardeners who might want to experiment themselves. “The use of the word ‘failed’ is repeated throughout [Jefferson’s] garden book, and one wonders if any gardener

has written about failure as much as Thomas Jefferson. He once also wrote that if he failed 99 times out of 100, that one success was worth the 99 failures,” Hatch says.

Passage 2: Thomas Jefferson, Food Pioneer

by Emily Goodman

This passage highlights Thomas Jefferson’s world travels and discusses how they affected both his gardening and eating habits.

- 7 As an old man, Thomas Jefferson wrote, “No occupation is so delightful to me as the culture of the earth, and no culture comparable to that of the garden. . . . Though an old man, I am but a young gardener.”
- 8 In Jefferson’s day, there were no supermarkets, no refrigerators, and no trucks or airplanes to move food quickly over long distances. Mostly, people ate only what they or their neighbors grew and made. Because of this, most people were familiar only with local plants and were afraid of new ones. Perhaps because Jefferson traveled in Europe—and because he always liked to try new things—he was an exception. He loved to grow unfamiliar plants. He experimented with new foods and plants in his “laboratory” garden at Monticello.

- 9 Using the most-modern farming methods of his time, Jefferson grew many “scary” new plants. (Of course, he learned to eat them, too.) In 1781, he began growing tomatoes, which Europeans thought were poisonous. Later, he introduced the potato, a plant unknown in America at that time. Jefferson also grew other “new” vegetables, such as cauliflower, eggplant, Mexican peppers, and beans from the Pacific Northwest brought back by Lewis and Clark.
- 10 During his travels, Jefferson brought many European plants back to America. For 23 years, he ordered seeds from Paris. Often he sent the seeds on to other American gardeners. He planted nearly 1,000 fruit trees in his Monticello orchard, including peaches, almonds, and cherries. He imported squash and broccoli from Italy and figs from France. And he tried 15 kinds of peas (his favorite vegetable) to see which tasted best.
- 11 From Holland, Jefferson brought home a waffle iron; from Italy, he smuggled rice. (Italian law at the time forbade taking the best rice out of the country. Jefferson did it anyway.) Our third president was the first American to make or use many dishes he had tasted in Europe, such as waffles, macaroni and cheese, and mustard.
- 12 In food, as in his other interests, Jefferson combined great ideas from Europe and America with exciting discoveries of his own. And we can thank him for that!

Read the passage and then answer Numbers 17 through 19. There are three underlined words or phrases in the passage to show which word or phrase may be incorrect.

We squint when the sun is in our eyes because the bright sunlight hurts. This is how our brain protected our eyes. Protecting our eyes is very important during an eclipse. An eclipse happens when an object moves between you and the object you are viewing.

A solar eclipse happens when the Moon moves between Earth and the Sun. The Moon blocks our view of the Sun. Viewing a solar eclipse can be exciting. It is not an everyday event. But can it be viewed safely? Yes; it can.

The safest and easiest way to view a solar eclipse is to build a pinhole camera. A pinhole camera lets you see what happens during a solar eclipse without looking directly at the Sun. It is a very valuable tool because it lets you turn your back to the Sun and protect your eyes.

Passage 1: Thomas Jefferson's Vegetable Garden: A Thing Of Beauty And Science

by Graham Smith

This passage describes the gardens at Thomas Jefferson's home, Monticello, and discusses the former president's passion for gardening.

- 1 After Jefferson retired from public life to his beloved Virginia hilltop plantation, the garden "served as a sort of this experimental testing lab where he'd try new vegetables he sought out from around the globe," says Peter Hatch, the estate's head gardener. Hatch recently wrote a book about Jefferson's garden and its history called *A Rich Spot of Earth*.
- 2 Somehow, the author of the Declaration of Independence and the nation's third president found spare time to meticulously document his many trials and errors, growing over 300 varieties of more than 90 different plants. These included exotics like sesame, chickpeas, sea kale and salsify. They're more commonly available now, but were rare for the region at the time. So were tomatoes and eggplant.
- 3 In the nearby South Orchard, he grew 130 varieties of fruit trees like peach, apple, fig and cherry. All the time, he carefully documented planting procedures, spacings of rows, when blossoms appeared, and when the food should come to the table. Behind Jefferson's "zeal to categorize the world around him" was a patriotic mission, Hatch says.
- 4 Jefferson wrote, "The greatest service which can be rendered any country is to add a useful plant to its culture." . . .
- 5 Lots of things failed in the garden. His entries from 1809 show the carrots, beets, sorrel and okra, the cauliflower, tarragon and Chinese melons missing the mark. Jefferson cites Windsor Beans as "killed by bug" and notes on Aug. 21: "From the 7th of Apr. to this day, excessive drought and cold. Now a good rain."
- 6 Hatch gives some hope to home gardeners who might want to experiment themselves. "The use of the word 'failed' is repeated throughout [Jefferson's] garden book, and one wonders if any gardener

has written about failure as much as Thomas Jefferson. He once also wrote that if he failed 99 times out of 100, that one success was worth the 99 failures,” Hatch says.

Passage 2: Thomas Jefferson, Food Pioneer

by Emily Goodman

This passage highlights Thomas Jefferson’s world travels and discusses how they affected both his gardening and eating habits.

- 7 As an old man, Thomas Jefferson wrote, “No occupation is so delightful to me as the culture of the earth, and no culture comparable to that of the garden. . . . Though an old man, I am but a young gardener.”
- 8 In Jefferson’s day, there were no supermarkets, no refrigerators, and no trucks or airplanes to move food quickly over long distances. Mostly, people ate only what they or their neighbors grew and made. Because of this, most people were familiar only with local plants and were afraid of new ones. Perhaps because Jefferson traveled in Europe—and because he always liked to try new things—he was an exception. He loved to grow unfamiliar plants. He experimented with new foods and plants in his “laboratory” garden at Monticello.

- 9 Using the most-modern farming methods of his time, Jefferson grew many “scary” new plants. (Of course, he learned to eat them, too.) In 1781, he began growing tomatoes, which Europeans thought were poisonous. Later, he introduced the potato, a plant unknown in America at that time. Jefferson also grew other “new” vegetables, such as cauliflower, eggplant, Mexican peppers, and beans from the Pacific Northwest brought back by Lewis and Clark.
- 10 During his travels, Jefferson brought many European plants back to America. For 23 years, he ordered seeds from Paris. Often he sent the seeds on to other American gardeners. He planted nearly 1,000 fruit trees in his Monticello orchard, including peaches, almonds, and cherries. He imported squash and broccoli from Italy and figs from France. And he tried 15 kinds of peas (his favorite vegetable) to see which tasted best.
- 11 From Holland, Jefferson brought home a waffle iron; from Italy, he smuggled rice. (Italian law at the time forbade taking the best rice out of the country. Jefferson did it anyway.) Our third president was the first American to make or use many dishes he had tasted in Europe, such as waffles, macaroni and cheese, and mustard.
- 12 In food, as in his other interests, Jefferson combined great ideas from Europe and America with exciting discoveries of his own. And we can thank him for that!

Read the passage and then answer Numbers 17 through 19. There are three underlined words or phrases in the passage to show which word or phrase may be incorrect.

We squint when the sun is in our eyes because the bright sunlight hurts. This is how our brain protected our eyes. Protecting our eyes is very important during an eclipse. An eclipse happens when an object moves between you and the object you are viewing.

A solar eclipse happens when the Moon moves between Earth and the Sun. The Moon blocks our view of the Sun. Viewing a solar eclipse can be exciting. It is not an everyday event. But can it be viewed safely? Yes; it can.

The safest and easiest way to view a solar eclipse is to build a pinhole camera. A pinhole camera lets you see what happens during a solar eclipse without looking directly at the Sun. It is a very valuable tool because it lets you turn your back to the Sun and protect your eyes.

Now answer Numbers 17 through 19. Choose the correct word or phrase for each of the following.

17. This is how our brain protected our eyes.

- ☐ (A) has protected
- ☒ (B) protects
- ☐ (C) will protect
- ☐ (D) correct as is

Option B: This answer is correct.

This option indicates the correct tense usage of the word "protects" in the sentence.

19. It is a very valuable tool because it lets you turn your back to the Sun and protect your eyes.

- ☐ (A) let

Option D: This answer is correct.

This option acknowledges the correct tense usage of the word "lets" in the sentence.

18. Yes; it can.

- ☐ (B) Yes:
- ☐ (C) Yes
- ☐ (D) correct as is

Option A: This answer is correct.

This option indicates the correct punctuation used in the sentence.

Read the passage and then answer Numbers 20 through 22. There are three underlined words or phrases in the passage to show which word or phrase may be incorrect.

20 Have you ever thought about getting a job as an ice cream taster when you grow up? It might sound too good to be true, but ice cream tasters get paid to do just that.

The job is more difficult than just eating ice cream all day, though. John Harrison is a master taster. This means that he has been sampling the sweet stuff for a long time. For more than thirty years, Harrison has sampled up to thirty different flavors of ice cream each day. Tasters like
21 Harrison have to consider the texture of each flavor, in addition to smell, color, and appearance.

22 If ice cream tasters are lucky, they can even get an oportunity to suggest new flavors. Harrison is always trying to think of the next great ice cream flavor. He even sleeps with a pencil and paper beside his bed, just in case he dreams up something delicious.

Now answer Numbers 20 through 22. Choose the correct word or phrase for each of the following.

20. What does the conjunction “but” do in the sentence?

- ☐ (A) It supports an opinion.
- ☐ (B) It introduces a new topic.
- ☒ It connects opposite ideas.
- ☐ (D) It presents another explanation.

Option C: **This answer is correct.**
“But” is a coordinating conjunction that is used to connect seemingly contrary ideas. In this situation, the idea that being an ice cream taster “sounds too good to be true” contrasts with the idea that it’s a legitimate, real career.

21. Choose the correct punctuation.
