

**ALGEBRA I****Tuesday, June 4, 2024 — 9:15 a.m. to 12:15 p.m., only****Student Name** _____**School Name** _____

The possession or use of any communications device is strictly prohibited when taking this examination. If you have or use any communications device, no matter how briefly, your examination will be invalidated and no score will be calculated for you.

Print your name and the name of your school on the lines above.

A separate answer sheet for **Part I** has been provided to you. Follow the instructions from the proctor for completing the student information on your answer sheet.

This examination has four parts, with a total of 35 questions. You must answer all questions in this examination. Record your answers to the Part I multiple-choice questions on the separate answer sheet. Write your answers to the questions in **Parts II, III, and IV** directly in this booklet. All work should be written in pen, except for graphs and drawings, which should be done in pencil. Clearly indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, etc. Utilize the information provided for each question to determine your answer. Note that diagrams are not necessarily drawn to scale.

The formulas that you may need to answer some questions in this examination are found at the end of the examination. This sheet is perforated so you may remove it from this booklet.

Scrap paper is not permitted for any part of this examination, but you may use the blank spaces in this booklet as scrap paper. A perforated sheet of scrap graph paper is provided at the end of this booklet for any question for which graphing may be helpful but is not required. You may remove this sheet from this booklet. Any work done on this sheet of scrap graph paper will *not* be scored.

When you have completed the examination, you must sign the statement printed at the end of the answer sheet, indicating that you had no unlawful knowledge of the questions or answers prior to the examination and that you have neither given nor received assistance in answering any of the questions during the examination. Your answer sheet cannot be accepted if you fail to sign this declaration.

Notice ...

A graphing calculator and a straightedge (ruler) must be available for you to use while taking this examination.

DO NOT OPEN THIS EXAMINATION BOOKLET UNTIL THE SIGNAL IS GIVEN.

Reference Sheet for Algebra I

Conversions

1 mile = 5280 feet
 1 mile = 1760 yards
 1 pound = 16 ounces
 1 ton = 2000 pounds

Conversions Across Measurement Systems

1 inch = 2.54 centimeters
 1 meter = 39.37 inches
 1 mile = 1.609 kilometers
 1 kilometer = 0.6214 mile
 1 pound = 0.454 kilogram
 1 kilogram = 2.2 pounds

Quadratic Equation	$y = ax^2 + bx + c$	Exponential Equation	$y = ab^x$
Quadratic Formula	$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$	Annual Compound Interest	$A = P(1 + r)^n$
Equation of the Axis of Symmetry	$x = -\frac{b}{2a}$	Arithmetic Sequence	$a_n = a_1 + d(n - 1)$
Slope	$m = \frac{y_2 - y_1}{x_2 - x_1}$	Geometric Sequence	$a_n = a_1 r^{n-1}$
Linear Equation Slope Intercept	$y = mx + b$	Interquartile Range (IQR)	$IQR = Q_3 - Q_1$
Linear Equation Point Slope	$y - y_1 = m(x - x_1)$	Outlier	Lower Outlier Boundary = $Q_1 - 1.5(IQR)$
			Upper Outlier Boundary = $Q_3 + 1.5(IQR)$

Part I

Answer all 24 questions in this part. Each correct answer will receive 2 credits. No partial credit will be allowed. Utilize the information provided for each question to determine your answer. Note that diagrams are not necessarily drawn to scale. For each statement or question, choose the word or expression that, of those given, best completes the statement or answers the question. Record your answers on your separate answer sheet. [48]

Use this space for
computations.

- 1 A ball was launched into the air, and its height above the ground was recorded each second, as shown in the table below.

Time (sec)	0	1	2	3	4
Height (ft)	11	59	75	59	11

Based on these data, which statement is a valid conclusion?

- (1) The ball lands on the ground at 4 seconds.
- (2) The ball reaches a maximum height of 11 feet.
- (3) The ball was launched from a height of 0 feet.
- (4) The ball reaches its maximum height at 2 seconds.

- 2 A tour bus can seat, at most, 48 passengers. An adult ticket costs \$18 and a child ticket costs \$12. The bus company must collect at least \$650 to make a profit. If a represents the number of adult tickets sold and c represents the number of child tickets sold, which system of inequalities models this situation if they make a profit?

- (1) $a + c < 48$
 $18a + 12c > 650$
- (2) $a + c \leq 48$
 $18a + 12c \geq 650$
- (3) $a + c < 48$
 $18a + 12c < 650$
- (4) $a + c \leq 48$
 $18a + 12c \leq 650$

- 3 Which equation is always true?

- (1) $x^2 \cdot x^3 = x^5$
- (2) $3^x \cdot 3^2 = 9^{2x}$
- (3) $-z^2 = z^2$
- (4) $7^a \cdot 7^b = 7^{ab}$

**Use this space for
computations.**

4 The expression $-2(x^2 - 2x + 1) + (3x^2 + 3x - 5)$ is equivalent to

(1) $x^2 + x - 4$

(3) $x^2 + 7x - 4$

(2) $x^2 - x - 7$

(4) $x^2 + 7x - 7$

5 Which sum is irrational?

(1) $-2\sqrt{12} + \sqrt{100}$

(3) $\frac{1}{2}\sqrt{25} + \sqrt{64}$

(2) $-\sqrt{4} + \frac{1}{3}\sqrt{900}$

(4) $\sqrt{49} + 3\sqrt{121}$

6 The solution to $\frac{4(x-5)}{3} + 2 = 14$ is

(1) 15

(3) 6

(2) 14

(4) 4

7 On an island, a rare breed of rabbit doubled its population each month for two years. Which type of function best models the increase in population at the end of two years?

(1) linear growth

(3) exponential growth

(2) linear decay

(4) exponential decay

8 What is the degree of the polynomial $2x - x^2 + 4x^3$?

(1) 1

(3) 3

(2) 2

(4) 4

**Use this space for
computations.**

9 The zeros of the function $f(x) = x(x - 5)(3x + 6)$ are

- (1) 0, -5 , and 2 (3) -5 and 2, only
(2) 0, 5, and -2 (4) 5 and -2 , only

10 What is the y -intercept of the line that passes through the points $(-1, 5)$ and $(2, -1)$?

- (1) -1 (3) 3
(2) -2 (4) 5

11 Nancy has just been hired for her first job. Her company gives her four choices for how she can collect her annual salary over the first eight years of employment.

Each function below represents the four choices she has for her annual salary in thousands of dollars, where t represents the number of years after she is hired.

$$a(t) = 2^t + 25$$

$$b(t) = 10t + 75$$

$$c(t) = \sqrt{400t} + 80$$

$$d(t) = 2(t + 1)^2 - 10t + 50$$

Which pay plan should Nancy choose in order to have the highest salary in her eighth year?

- (1) $a(t)$ (3) $c(t)$
(2) $b(t)$ (4) $d(t)$

12 The third term in a sequence is 25 and the fifth term is 625. Which number could be the common ratio of the sequence?

- (1) $\frac{1}{5}$ (3) $\frac{1}{25}$
(2) 5 (4) 25

13 The box plot below summarizes the data for the amount of snowfall, in inches, during the winter of 2021 for 12 locations in western New York.

- 14** Four quadratic functions are represented below.

I

III

Which function has the *smallest* minimum value?

- Algebra I – June '24

**Use this space for
computations.**

- 15** The equation that represents the sequence $-2, -5, -8, -11, -14, \dots$ is

(1) $a_n = -3 + (-2)(n - 1)$ (3) $a_n = 3 + (-2)(n - 1)$

(2) $a_n = -2 + (-3)(n - 1)$ (4) $a_n = -2 + (3)(n - 1)$

- 16** The dot plot below shows the number of goals Jessica scored in each lacrosse game last season.

Which statement about the dot plot is correct?

- (1) mean $>$ mode (3) mode = median
(2) mean = median (4) median $>$ mean

- 17** The students in Mrs. Smith's algebra class were asked to describe the graph of $g(x) = 2(x - 3)^2$ compared to the graph of $f(x) = x^2$.

Which student response is correct?

- (1) Ashley said that the graph of $g(x)$ is wider and shifted left 3 units.
(2) Beth said that the graph of $g(x)$ is narrower and shifted left 3 units.
(3) Carl said that the graph of $g(x)$ is wider and shifted right 3 units.
(4) Don said that the graph of $g(x)$ is narrower and shifted right 3 units.

Use this space for
computations.

- 18 One Saturday, Dave took a long bike ride. The graph below models his trip.

What was Dave's average rate of change, in miles per hour, on this trip?

- | | |
|--------|----------|
| (1) 10 | (3) 11.6 |
| (2) 11 | (4) 14.5 |
- 19 Which expression is equivalent to $(x - 5)(2x + 7) - (x + 5)$?
- | | |
|----------------------|----------------------|
| (1) $2x^2 - 2x - 30$ | (3) $2x^2 - 4x - 30$ |
| (2) $2x^2 - 2x - 40$ | (4) $2x^2 - 4x - 40$ |

Use this space for
computations.

20 The functions $f(x)$ and $g(x)$ are graphed on the set of axes below.

What is the solution to the equation $f(x) = g(x)$?

- (1) 1 and 5 (3) -3 and 5
(2) -5 and 0 (4) 0 and 4
- 21 When babysitting, Nicole charges an hourly rate and an additional charge for gas. She uses the function $C(h) = 6h + 5$ to determine how much to charge for babysitting. The constant term of this function represents
- (1) the additional charge for gas
(2) the hourly rate Nicole charges
(3) the number of hours Nicole babysits
(4) the total Nicole earns from babysitting

22 When solved for x in terms of a , the solution to the equation $3x - 7 = ax + 5$ is

- (1) $\frac{12}{3a}$ (3) $\frac{3a}{12}$
(2) $\frac{12}{3 - a}$ (4) $\frac{3 - a}{12}$

**Use this space for
computations.**

- 23** Wayde van Niekerk, a runner from South Africa, ran 400 meters in 43.03 seconds to set a world record. Which calculation would determine his average speed, in miles per hour?

(1) $\frac{400 \text{ m}}{43.03 \text{ sec}} \cdot \frac{1000 \text{ m}}{0.62 \text{ mi}} \cdot \frac{1 \text{ hr}}{3600 \text{ sec}}$

(2) $\frac{400 \text{ m}}{43.03 \text{ sec}} \cdot \frac{0.62 \text{ mi}}{1000 \text{ m}} \cdot \frac{1 \text{ hr}}{3600 \text{ sec}}$

(3) $\frac{400 \text{ m}}{43.03 \text{ sec}} \cdot \frac{0.62 \text{ mi}}{1000 \text{ m}} \cdot \frac{3600 \text{ sec}}{1 \text{ hr}}$

(4) $\frac{400 \text{ m}}{43.03 \text{ sec}} \cdot \frac{1000 \text{ m}}{0.62 \text{ mi}} \cdot \frac{3600 \text{ sec}}{1 \text{ hr}}$

- 24** Which function has a domain of all real numbers and a range greater than or equal to three?

(1) $f(x) = -x + 3$

(3) $h(x) = 3^x$

(2) $g(x) = x^2 + 3$

(4) $m(x) = |x + 3|$

Part II

Answer all 6 questions in this part. Each correct answer will receive 2 credits. Clearly indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, etc. Utilize the information provided for each question to determine your answer. Note that diagrams are not necessarily drawn to scale. For all questions in this part, a correct numerical answer with no work shown will receive only 1 credit. All answers should be written in pen, except for graphs and drawings, which should be done in pencil. [12]

25 Solve $5(x - 2) \leq 3x + 20$ algebraically.

26 Given $g(x) = x^3 + 2x^2 - x$, evaluate $g(-3)$.

27 Given the relation $R = \{(-1,1), (0,3), (-2,-4), (x,5)\}$.

State a value for x that will make this relation a function.

Explain why your answer makes this a function.

28 A survey of 150 students was taken. It was determined that $\frac{2}{3}$ of the students play video games.
Of the students that play video games, 85 also use social media.
Of the students that do not play video games, 20% do not use social media.

Complete the two-way frequency table.

	Play Video Games	Do Not Play Video Games	Total
Social Media			
No Social Media			
Total			

29 Use the method of completing the square to determine the exact values of x for the equation $x^2 + 10x - 30 = 0$.

30 Factor $20x^3 - 45x$ completely.

Part III

Answer all 4 questions in this part. Each correct answer will receive 4 credits. Clearly indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, etc. Utilize the information provided for each question to determine your answer. Note that diagrams are not necessarily drawn to scale. For all questions in this part, a correct numerical answer with no work shown will receive only 1 credit. All answers should be written in pen, except for graphs and drawings, which should be done in pencil. [16]

31 Graph the following system of equations on the set of axes below.

$$y = x^2 - 3x - 6$$

$$y = x - 1$$

State the coordinates of all solutions.

32 The table below shows the amount of money a popular movie earned, in millions of dollars, during its first six weeks in theaters.

Week (x)	1	2	3	4	5	6
Dollars Earned, in Millions (y)	185	150	90	50	25	5

Write the linear regression equation for this data set, rounding all values to the *nearest hundredth*.

State the correlation coefficient to the *nearest hundredth*.

State what this correlation coefficient indicates about the linear fit of the data.

33 Use the quadratic formula to solve the equation $3x^2 - 10x + 5 = 0$. Express the answer in simplest radical form.

34 Graph the system of inequalities on the set of axes below.

$$3y + 2x \leq 15$$

$$y - x > 1$$

State the coordinates of a point in the solution to this system. Justify your answer.

Part IV

Answer the question in this part. A correct answer will receive 6 credits. Clearly indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, etc. Utilize the information provided to determine your answer. Note that diagrams are not necessarily drawn to scale. A correct numerical answer with no work shown will receive only 1 credit. All answers should be written in pen, except for graphs and drawings, which should be done in pencil. [6]

35 Courtney went to a coffee shop to purchase lattes and donuts for her friends. One day she spent a total of \$15.50 on four lattes and two donuts. The next day she spent a total of \$18.10 on three lattes and five donuts. All prices included tax.

If x represents the cost of one latte and y represents the cost of one donut, write a system of equations that can be used to model this situation.

Courtney thinks that one latte costs \$2.75 and one donut costs \$2.25.
Is Courtney correct? Justify your answer.

Use your equations to determine algebraically the exact cost of one latte and the exact cost of one donut.

Part II

For each question, use the specific criteria to award a maximum of 2 credits. Unless otherwise specified, mathematically correct alternative solutions should be awarded appropriate credit.

(25) [2] $x \leq 15$, and correct algebraic work is shown.

[1] Appropriate work is shown, but one computational error is made.

or

[1] Appropriate work is shown, but one conceptual error is made.

or

[1] $x \leq 15$, but a method other than algebraic is used.

or

[1] $x \leq 15$, but no work is shown.

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

(26) [2] -6 , and correct work is shown.

[1] Appropriate work is shown, but one computational error is made.

or

[1] Appropriate work is shown, but one conceptual error is made.

or

[1] -6 , but no work is shown.

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

(27) [2] A correct value is stated, and a correct explanation is written.

[1] One conceptual error is made.

or

[1] A correct value is stated, but the explanation is missing, incomplete, or incorrect.

or

[1] A correct explanation is written, but no further correct work is shown.

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

(28) [2] The frequency table is completed correctly.

	Play Video Games	Do Not Play Video Games	Total
Social Media	85	40	125
No Social Media	15	10	25
Total	100	50	150

[1] Appropriate work is shown, but one computational error is made.

or

[1] Appropriate work is shown, but one conceptual error is made.

or

[1] Either 100 or 10 is written correctly in the table, and no further correct work is shown.

[0] Only the given information of 150 and 85 is written in the table.

or

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

(29) [2] $-5 \pm \sqrt{55}$, and correct work is shown.

[1] Appropriate work is shown, but one computational error is made.

or

[1] Appropriate work is shown, but one conceptual error is made.

or

[1] Appropriate work is shown, but only one solution is stated.

or

[1] $-5 \pm \sqrt{55}$, but a method other than completing the square is used.

or

[1] $-5 \pm \sqrt{55}$, but no work is shown.

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

(30) [2] $5x(2x - 3)(2x + 3)$, and correct work is shown.

[1] Appropriate work is shown, but one computational or factoring error is made.

or

[1] Appropriate work is shown, but one conceptual error is made.

or

[1] $5x(4x^2 - 9)$ is written, but no further correct work is shown.

or

[1] $5x(2x - 3)(2x + 3)$, but no work is shown.

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

Part III

For each question, use the specific criteria to award a maximum of 4 credits. Unless otherwise specified, mathematically correct alternative solutions should be awarded appropriate credit.

(31) [4] Correct graphs are drawn, and $(-1, -2)$ and $(5, 4)$ are stated.

[3] Appropriate work is shown, but one graphing error is made.

or

[3] Appropriate work is shown, but only the coordinates of one point are stated correctly.

or

[3] Appropriate work is shown, and solutions are indicated on the graph, but the coordinates are not stated.

[2] Both equations are graphed correctly, but no further correct work is shown.

or

[2] $(-1, -2)$ and $(5, 4)$ are stated, but a method other than graphing is used.

[1] One equation is graphed correctly, but no further correct work is used.

or

[1] $(-1, -2)$ and $(5, 4)$ are stated, but no work is shown.

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

(32) [4] $y = -37.57x + 215.67$, -0.98 , and strong is stated.

[3] Appropriate work is shown, but one rounding error is made.

or

[3] Appropriate work is shown, but the expression $-37.57x + 215.67$ is written.

or

[3] The full display of the student's calculator, showing incorrect values for a , b , and r , is written and used appropriately.

[2] $y = -37.57x + 215.67$ is written, but no further correct work is shown.

[1] -0.98 , but no further correct work is shown.

or

[1] Strong is stated, but no further correct work is shown.

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

(33) [4] $\frac{10 \pm 2\sqrt{10}}{6}$ or $\frac{5 \pm \sqrt{10}}{3}$ is written, and correct work is shown.

[3] Appropriate work is shown, but one computational or simplification error is made.

or

[3] Appropriate work is shown, but only one solution is stated.

[2] Appropriate work is shown, but two or more computational or simplification errors are made.

or

[2] Appropriate work is shown to find $\frac{10 \pm \sqrt{40}}{6}$, but no further correct work is shown.

or

[2] $\frac{10 \pm 2\sqrt{10}}{6}$, but a method other than the quadratic formula is used.

[1] A correct substitution is made into the quadratic formula, but no further correct work is shown.

or

[1] $\frac{10 \pm 2\sqrt{10}}{6}$, but no work is shown.

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

(34) [4] The system of inequalities is graphed correctly and at least one is labeled, a correct point is stated, and a correct justification is given.

[3] Appropriate work is shown, but one computational, graphing, or labeling error is made.

or

[3] Appropriate work is shown, but the justification is missing or incorrect.

or

[3] One inequality is graphed incorrectly, but the system is used appropriately.

[2] The system of inequalities is graphed correctly and at least one is labeled, but no further correct work is shown.

or

[2] A correct point is stated and a correct justification is given, but no further correct work is shown.

[1] One inequality is graphed and labeled correctly, but no further correct work is shown.

or

[1] A correct point is stated, but no further correct work is shown.

or

[1] $3y + 2x = 15$ and $y - x = 1$ are graphed correctly and at least one is labeled, but no further correct work is shown.

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.

Part IV

For this question, use the specific criteria to award a maximum of 6 credits. Unless otherwise specified, mathematically correct alternative solutions should be awarded appropriate credit.

- (35) [6] A correct system of equations is written, a correct justification indicating a negative response is given, and correct algebraic work is shown to find 2.95, the cost of one latte, and 1.85, the cost of one donut.

[5] Appropriate work is shown, but one computational error is made.

or

[5] One equation is written incorrectly, but the system is used appropriately.

or

[5] Appropriate work is shown, but a method other than algebraic is used to find 2.95, the cost of a latte and 1.85, the cost of a donut.

[4] Appropriate work is shown, but two or more computational errors are made.

or

[4] A correct system of equations is written and solved correctly, but no further correct work is shown.

[3] A correct system of equations is written, but a justification indicating a positive response is given based upon substitution in only the first equation, and no further correct work is shown.

or

[3] A correct system of equations is written, but an incomplete justification is given, and no further correct work is shown.

[2] A correct system of equations is written, but no further correct work is shown.

or

[2] A correct justification indicating a negative response is given, but no further correct work is shown.

[1] One equation is written correctly, but no further correct work is shown.

or

[1] 2.95, the cost of a latte and 1.85, the cost of a donut are stated, but no work is shown.

[0] 2.95 and 1.85, but no work is shown.

or

[0] A zero response does not contain enough relevant course-level work to receive any credit, does not satisfy the criteria for one or more credits, or is a correct response that was obtained by an obviously incorrect procedure.
