

Grade 3
General
Mathematics

Directions:

On the following pages of your practice test booklet are questions for the Grade 3 *Nebraska Student-Centered Assessment System (NSCAS) General Mathematics* practice test.

Read these directions carefully before beginning the test.

This practice test will include several different types of questions. Multiple choice questions will ask you to select an answer from among four choices. Multiple select questions will ask you to select multiple correct answers from among five or more answer choices. For some questions, there may be two parts, Part A and Part B, where each part has a multiple choice or multiple select question. Some questions will ask you to construct an answer by following the directions given.

For all questions:

- Read each question carefully and choose the best answer.
- You may use scratch paper to solve the problems.
- Be sure to answer ALL the questions.

1. Use the number line below to answer the question.

Which letter shows the location of $\frac{2}{10}$?

- A. W
- B. X
- C. Y
- D. Z

2. What is the most specific name for each figure? Write A, B, C, and D in the correct place in the Venn Diagram.

3. Which array shows 7×5 ?

4. The table shows the number of books the students in a class read each month for five months.

Books Read

Month	Number of Books
January	75
February	90
March	60
April	55
May	40

The students are making a pictograph to represent this data. In the pictograph, a picture of a book represents 5 books. How many books do the students need to draw for the month of February?

- A. 9
 - B. 12
 - C. 15
 - D. 18
5. Which is equal to $9,000 + 900 + 9$?
- A. 9,099
 - B. 9,909
 - C. 9,990
 - D. 9,999

6. Use the bar graph below to answer the question.

How many more kittens and hamsters are there than snakes and birds?

- A. 0
- B. 10
- C. 20
- D. 30

7. Use the clock to answer the question.

What time is shown on the clock? Write the answer on the lines.

0 1 2 3 4 5 6 7 8 9

— : —

8. Use the number line to answer the question.

Which statement about dividing each third of the number line is correct?

- A. Dividing each third of the number line into 5 equal parts will show equivalent fractions with a denominator of 20.
- B. Dividing each third of the number line into 4 equal parts will show equivalent fractions with a denominator of 12.
- C. Dividing each third of the number line into 3 equal parts will show equivalent fractions with a denominator of 6.
- D. Dividing each third of the number line into 2 equal parts will show equivalent fractions with a denominator of 4.

9. **This question has two parts. Answer Part A, and then answer Part B.**

Students in a third grade class listed their favorite animal for a pet. The pictograph shows the results.

Key:  = 2 students

Part A

The number of students who said dogs are their favorite pet is missing from the pictograph. A total of 16 students said cats and dogs are their favorite. How many students said dogs are their favorite?

- A. 13 students
- B. 10 students
- C. 5 students
- D. 2 students

Part B

How many circles should be used in the pictograph for dogs?

- A. 5 whole circles
- B. 10 whole circles
- C. 4 whole circles and 1 half circle
- D. 6 whole circles and 1 half circle

10. Use the array to answer the question.

Which repeated addition sentence is represented by the array?

- A. $3 + 5$
- B. $5 + 5 + 5$
- C. $3 + 3 + 3$
- D. $5 + 5 + 5 + 5 + 5$

NSCAS GENERAL — MATHEMATICS

11. How do the numbers 960 and 1,060 compare to each other? Select the correct choices to complete the statement.

The value of 960 is (**less than, greater than**) the value of 1,060 because 100 can be (**added to, subtracted from**) 960 to get 1,060.

12. Use the diagram below to answer the question.

What is the length of the key to the nearest quarter inch?

- A. 2 inches
- B. $2\frac{1}{4}$ inches
- C. $2\frac{1}{2}$ inches
- D. 3 inches

13. What is 3×10 ? Write the answer in the box.

--

14. Use the picture below to answer the question.

Fraction Strips

Which statement is true?

- A. $\frac{1}{2} = \frac{3}{5}$ B. $\frac{1}{3} = \frac{2}{4}$
 C. $\frac{2}{4} = \frac{4}{5}$ D. $\frac{2}{3} = \frac{4}{6}$

15. Use the bar graph to answer the question.

Which **two** statements are correct?

- A. The number of tickets sold for the Ferris wheel and the bumper cars was more than the number of tickets sold for the slide and the roller coaster.
- B. The number of tickets sold for the roller coaster was more than the number of tickets sold for the Ferris wheel and the slide.
- C. The number of tickets sold for the roller coaster was 50 more than the number of tickets sold for the bumper cars.
- D. The number of tickets sold for the Ferris wheel was 10 fewer than the number of tickets sold for the slide.
- E. The number of tickets sold for the slide was 20 more than the number of tickets sold for the bumper cars.

16. Use the figure to answer the question.

The figure has a perimeter of 23 centimeters (cm). What is the length of the unknown side?

- A. 8 cm
- B. 15 cm
- C. 18 cm
- D. 23 cm

NSCAS GENERAL — MATHEMATICS

17. Which fractions are greater than $\frac{3}{10}$ and less than $\frac{7}{10}$?

Select **three** fractions.

A. $\frac{2}{10}$

B. $\frac{5}{10}$

C. $\frac{8}{10}$

D. $\frac{4}{10}$

E. $\frac{6}{10}$

F. $\frac{1}{10}$

18. Use the shapes to answer the question.

Which sentence about the shapes is true?

- A. All the shapes with an X are both squares and rectangles.
- B. All the shapes with an X are both squares and rhombuses.
- C. All the shapes with an X are both rectangles and rhombuses.
- D. All the shapes with an X are both rectangles and parallelograms.

19. Use the array to answer the question.

Which pair of expressions can be used to represent the array?

- A. 3×6 and $6 \div 3$
- B. 18×3 and $18 \div 6$
- C. 3×6 and $18 \div 3$
- D. 18×6 and $18 \div 3$

20. Use the number line to answer the question.

Which fraction represents point Y?

- A. $\frac{3}{3}$
- B. $\frac{3}{4}$
- C. $\frac{4}{4}$
- D. $\frac{4}{5}$
