Practice Exam

This exam may not be posted on school or personal websites, nor electronically redistributed for any reason. This Released Exam is provided by the College Board for AP Exam preparation. Teachers are permitted to download the materials and make copies to use with their students in a classroom setting only. To maintain the security of this exam, teachers should collect all materials after their administration and keep them in a secure location.

Further distribution of these materials outside of the secure College Board site disadvantages teachers who rely on uncirculated questions for classroom testing. Any additional distribution is in violation of the College Board's copyright policies and may result in the termination of Practice Exam access for your school as well as the removal of access to other online services such as the AP Teacher Community and Online Score Reports.

WORLD HISTORY

SECTION I, Part A

Time — 55 minutes

55 Questions

Directions: Each of the questions or incomplete statements is followed by four suggested answers or completions. Select the one that is best in each case and then fill in the corresponding circle on the answer sheet.

Source materials have been edited for the purpose of this exercise.

Questions 1 - 3 refer to the passage below.

“Darius I of Persia [reigned 522–486 B.C.E.] proceeded to establish twenty governments of the kind which the Persians call satrapies, assigning to each its governor, and fixing the tribute which was to be paid him by the several nations. And generally he joined together in one satrapy the nations that were neighbors. The following is an account of these governments, and of the yearly tribute which they paid to the king:

The Greeks and the Syrians paid a tribute of seven hundred and sixty talents* of silver.

All Phoenicia, Palestine, and Cyprus to the borders of Egypt paid a tribute of three hundred and fifty talents of silver.

From Egypt, and the neighboring parts of Libya, the tribute which came in was seven hundred talents of silver.

From Babylonia, and the rest of Assyria, were drawn a thousand talents of silver.

The Indians—360 talents of gold-dust. . . .

Such was the revenue which Darius derived from Asia and a small part of Libya.”

*A talent was a measure of weight equal to approximately 60 pounds.

Herodotus, Greek historian, *The Histories*, circa 430 B.C.E.

1. The passage best exemplifies which of the following processes?
 - (A) The creation of an elaborate military infrastructure
 - (B) The creation of social hierarchies
 - (C) The creation of institutions to organize subject peoples
 - (D) The creation of an infrastructure to promote trade
2. Large tribute obligations like the ones described in the passage would eventually contribute most to which of the following problems facing imperial societies in the period 600 B.C.E. to 600 C.E.?
 - (A) Alienation of local elites
 - (B) Increasing gender inequality
 - (C) Proliferation of religious conflicts
 - (D) Decline of interregional trade
3. Which of the following represents a significant cultural impact that the Persian Empire had on Afro-Eurasia?
 - (A) The spread of animist beliefs
 - (B) The codification of Jewish scripture
 - (C) The founding of Buddhism
 - (D) The development of Zoroastrianism

Questions 4 - 6 refer to the song below.

The Primordial Beginning

“Heaven is everlasting;
Life itself is brief;
The world is fleeting, but the Way eternal.
‘Tis the road of meditation that begins the distant journey,
While the sea of craving sets adrift the lighter crafts.
Before the dust of bondage has been cleared away,
How can the plantings of the mind be contemplated?
Yet, what need is there to wash away the grime of passion?
In the waters of the Truth there is a tranquil flow.”

Wang Jung, Chinese poet, “Songs of Religious Joy,” fifth century C.E.

Source: *The Journal of the American Oriental Society*, Vol. 107,
No. 1 (Jan.–Mar., 1987), pp. 31–38

4. The poem is most heavily influenced by which of the following Chinese cultural traditions?
 - (A) Confucianism
 - (B) Daoism
 - (C) Ancestor worship
 - (D) Legalism
5. The poem most clearly illustrates which of the following?
 - (A) The integration of Buddhism into Chinese religious beliefs
 - (B) Popular discontent at the collapse of the Qin dynasty
 - (C) The rise of Neoconfucianism during the Tang dynasty
 - (D) Chinese state policies aimed at suppressing Confucianism
6. In which of the following regions did Chinese cultural traditions have the longest-lasting influence?
 - (A) Indonesia
 - (B) Korea
 - (C) Persia
 - (D) India

Questions 7 - 9 refer to the passage below.

“Scholars have been mesmerized by the huge extent of the present distribution of Bantu languages and could think of only a single process, an equally huge human migration, ‘the Bantu expansion,’ to explain it. . . . [This] scenario is fatally flawed, however, for two reasons. First it fell prey to the illusion that only a migration could fit the evidence. . . . [But] a language can spread without involving the migration of any communities. The second fatal error was to collapse a history which encompassed the developments of one to several millennia into a single migration event. The evidence shows that many different dispersals of single languages succeeded each other at different times, not continuously.”

Jan Vansina, historian, “New Linguistic Evidence and ‘the Bantu Expansion,’” scholarly article, 1995.

7. Based on Vansina’s interpretation, the spread of Bantu languages in sub-Saharan Africa spanned a length of time most similar to that of the spread of
- (A) gunpowder technology in Asia
 - (B) horse domestication in North America
 - (C) industrialization in western Europe
 - (D) agriculture in Eurasia
8. In addition to languages, the peoples discussed in the passage are credited with the diffusion of which of the following in sub-Saharan Africa?
- (A) Monumental architecture
 - (B) New agricultural techniques
 - (C) Nomadism
 - (D) Writing systems
9. All of the following statements are factually accurate. Which would best support the author’s argument in the passage?
- (A) DNA evidence suggests human populations in western, central, and southern Africa share many similar genes.
 - (B) Linguistic evidence shows that several small groups in central and southern Africa continue to speak non-Bantu languages.
 - (C) Archaeological evidence suggests that iron metallurgy spread across sub-Saharan Africa in several distinct waves, separated by hundreds of years.
 - (D) Ethnographic evidence shows that many West African societies share common themes in their cultural and religious traditions.

Questions 10 - 12 refer to the poem below.

“Mulan weaves, facing the door.
You only hear daughter’s sighs.
They ask daughter who’s in her heart,
They ask daughter who’s on her mind.
‘No one is in daughter’s heart,
No one is on daughter’s mind.
Last night I saw the draft posters,
The Son of Heaven,* the great Khan,**
 is calling many troops,
The army list is in twelve scrolls,
On every scroll there’s father’s name.
Father [is too old and] has no grown-up son,
I have no elder brother.
I want to buy a saddle and horse,
And serve in the army in father’s place.’

At dawn she takes leave of the Yellow River,
In the evening she arrives at Black Mountain.
She doesn’t hear the sound of
 father and mother calling,
She goes ten thousand miles on the business of war. . . .”

Courtesy of Yale University Press

The Ballad of Mulan, a Chinese epic poem, circa 500 C.E.

*a traditional Chinese title given to the emperor

**the title of the emperor of the Turkic Northern Wei dynasty, which ruled northern China from 386 to 534 C.E.

10. The khan's method of military recruitment as referenced in the first stanza best demonstrates which of the following continuities of the period 600 B.C.E. to 600 C.E.?
- (A) Imperial efforts at military mobilization upheld traditional social roles.
 - (B) Imperial officials relied on Daoist approaches to military conflicts.
 - (C) Imperial attempts at administrative centralization often generated revolts.
 - (D) Imperial officials relied on militia to provide effective local governance.
11. A historian would most likely use the ballad as evidence of which of the following?
- (A) Challenges to traditional gender roles in premodern China
 - (B) The rejection of Chinese institutions by nomads
 - (C) The spread of Buddhism into China
 - (D) Fluctuations in the production of luxury goods in China because of domestic conflict
12. Mulan's attitude toward her family and the ruler as illustrated in the ballad best exemplifies the values of which of the following east Asian traditions?
- (A) Shinto
 - (B) Confucianism
 - (C) Buddhism
 - (D) Daoism

Questions 13 - 15 refer to the passage below.

“Brother, you had written to me that you sent roughly 6,300 pounds of block iron to me from India in the ship of the Muslim captain Abu’l-Kata’ib. But when the ship arrived here, it only carried 5,100 pounds and the Muslim shipowner said that that was everything he had received from your Indian agent before setting sail.

To compensate for the difference, I have charged you the Muslim captain’s transportation fee for the above-mentioned iron that was sent to me here in Aden* and for pepper that was sent with it. I am also charging you the transportation fee for items that I am sending to you in India, including twenty-five pounds of copper bars, ten Berbera* mats in a package, cloth, a piece of lead weighing two hundred and forty-five pounds, two large boxes of sugar, and a package of the best Egyptian paper.”

*Aden and Berbera were prominent Indian Ocean port cities.

Letter from Madmun ibn al-Hassan, a Jewish merchant in Aden, to his brother in India, circa 1133 C.E. The letter was written in Judeo-Arabic, a form of the Arabic language written in the Hebrew script.

13. The relationships between the individuals mentioned in the passage best support which of the following conclusions about Indian Ocean trade in the period 600–1450 C.E.?
- (A) Non-Muslim merchants in the Indian Ocean trade networks encountered various forms of discrimination that made their businesses uncompetitive.
 - (B) Commercial relationships between Muslims and non-Muslims were a key element of the flourishing Indian Ocean trade networks.
 - (C) Non-Muslim religious leaders in the Indian Ocean region used their economic wealth to challenge the authority of Muslim states.
 - (D) Indian merchants successfully monopolized the production and distribution of precious metals in the Indian Ocean region.
14. The letter best illustrates which of the following continuities in the period circa 600–1450 C.E.?
- (A) State support for merchants encouraged greater commercial activity.
 - (B) Technological advances in shipbuilding facilitated the growth of Afro-Eurasian trade.
 - (C) Diasporic communities were often established in key locations along important trade routes.
 - (D) Increasing commercial wealth led to the emergence of new social structures.

15. Trade in the items referred to in the second paragraph is best understood in the context of which of the following?
- (A) The development of cash-crop plantations in India
 - (B) The adoption of traditional African religious practices in the Muslim world
 - (C) The increasing demand for high-value goods and manufactures in Afro-Eurasia
 - (D) The spread of literacy across the Muslim world

Questions 16 - 18 refer to the image below.

**MOSAIC IN THE CHURCH OF THE HAGIA SOPHIA IN CONSTANTINOPLE,
ELEVENTH CENTURY C.E.**

Bridgeman Images

The mosaic depicts the emperor and empress of the Byzantine Empire presenting the enthroned Jesus of Nazareth with gifts.

16. The mosaic can be used as evidence for all of the following EXCEPT
- (A) the importance of public rituals in imperial societies
 - (B) the significance of religious symbolism in Eastern Christian culture
 - (C) the decline of patriarchy in imperial societies
 - (D) the prominent role of women of the imperial family in Byzantine society
17. Which of the following motivations most likely explains the depiction of the emperor and empress in the mosaic?
- (A) A desire to highlight imperial subordination to the Christian church
 - (B) A desire to demonstrate the rulers' renunciation of wealth
 - (C) A desire to use the Christian church to legitimize imperial rule
 - (D) A desire to illustrate the rulers' sponsorship of the trade in luxury goods
18. Which of the following most directly led to the collapse of the Byzantine Empire in the fifteenth century?
- (A) The expansion of the Umayyad and Abbasid caliphates
 - (B) The expansion of the Ottoman Empire
 - (C) The expansion of the Mongol Empire
 - (D) The expansion of Crusading activities in the Mediterranean region

Questions 19 - 21 refer to the passage below.

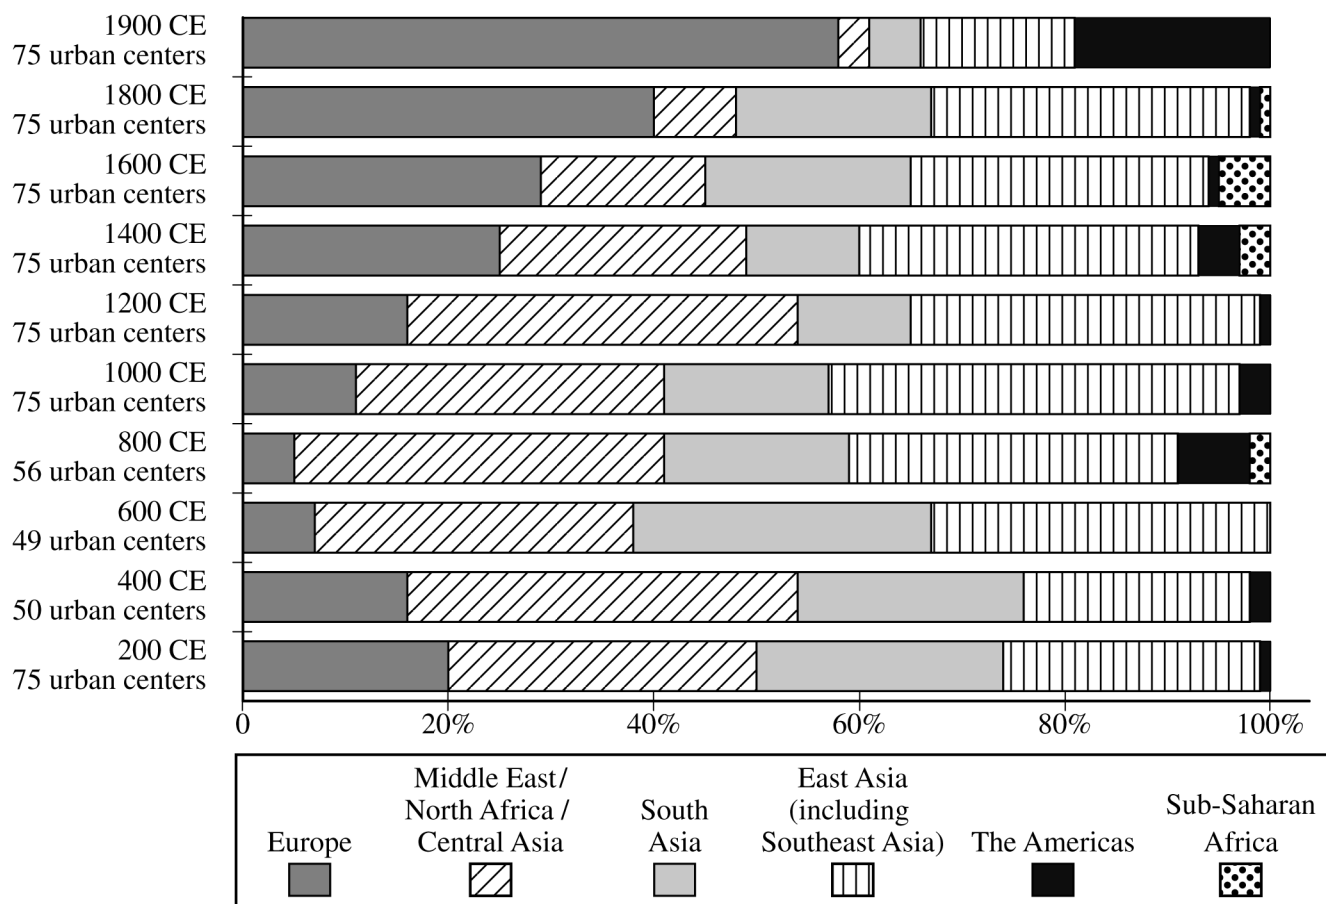

“Consider how in our time God has transferred the West into the East. He who was a Roman or a Frank is now an inhabitant of Palestine. We have already forgotten the places of our birth. Some already possess homes and servants here. Some have taken wives not merely of their own people, but Syrians, or Armenians, or even Muslims who have received the grace of baptism. Different languages, now made common, become known to both peoples, and faith unites those whose forefathers were strangers. Our parents and relatives from day to day come to join us, abandoning, even though reluctantly, all that they possess. For those who were poor there, here God makes rich. Those who had few coins, here possess countless riches. Those who did not have a home in the West, by the gift of God, already possess a city in the East. Therefore, why should one who has found the East so favorable return to the West? God does not wish those to suffer poverty who, carrying their crosses, have vowed to follow Him, even unto the end.”

Fulcher of Chartres, French clergyman, chronicle written in Jerusalem, early
twelfth century C.E.

19. The conditions described in the passage most directly reflect which of the following changes?
- (A) The displacement of European Christians after the Muslim conquest of Spain
 - (B) The establishment of Latin Christian states in the eastern Mediterranean during the Crusades
 - (C) The settlement of Latin Christian merchant communities in the Byzantine Empire
 - (D) The incursions of Eurasian nomads into the territories of the Roman Empire
20. The linguistic processes alluded to in the passage were most likely the result of which of the following?
- (A) Laws mandating the use of an official language
 - (B) A trend toward uniformity of language, which was a result of the spread of public education
 - (C) The gradual disappearance of the divide between religious and vernacular languages
 - (D) The need for daily social and commercial interaction between people not sharing a common native language
21. Which of the following earlier developments best explains the difference in wealth between western Europe and the Middle East as observed by Fulcher in the passage?
- (A) The economic impact of the political unification of Central Asia under the Mongols
 - (B) The consolidation of Muslim rule over long-distance trade networks in Eurasia
 - (C) The expansion of the Persian Empire’s commercial and political significance
 - (D) The disintegration of Jewish and Muslim trading networks in western Europe

Questions 22 - 25 refer to the graph below.

LOCATIONS OF THE WORLD'S MAJOR CITIES, 200–1900 C.E.

Data adapted from David Wilkinson, "Cities, Civilizations and Oikumenes," *Comparative Civilizations Review*: Vols. 27 and 28: Nos. 27 and 28, 1992–1993

22. Which of the following best accounts for the change in the overall number of major cities between 200 and 400 C.E.?
- (A) Environmental changes as part of the Little Ice Age
 - (B) The spread of Buddhism from South Asia to Central Asia and East Asia
 - (C) The decline or collapse of classical empires in eastern and western Eurasia
 - (D) The adoption of agriculture in previously uncultivated regions of the Americas and Sub-Saharan Africa

23. The data for the period 600–800 C.E. best illustrate which of the following?
- (A) The end of the Mauryan Empire led to a decline of urban centers in South Asia.
 - (B) The establishment of Islamic caliphates resulted in urban revival in the Middle East, Central Asia, and North Africa.
 - (C) The lack of political unity among Maya city-states hampered the development of Mesoamerican civilization.
 - (D) The establishment of the Tang dynasty in China led to an increase of long-distance trade along the overland Silk Roads.

24. The changes in the distribution of cities in the period 1200–1400 C.E. best support which of the following conclusions?

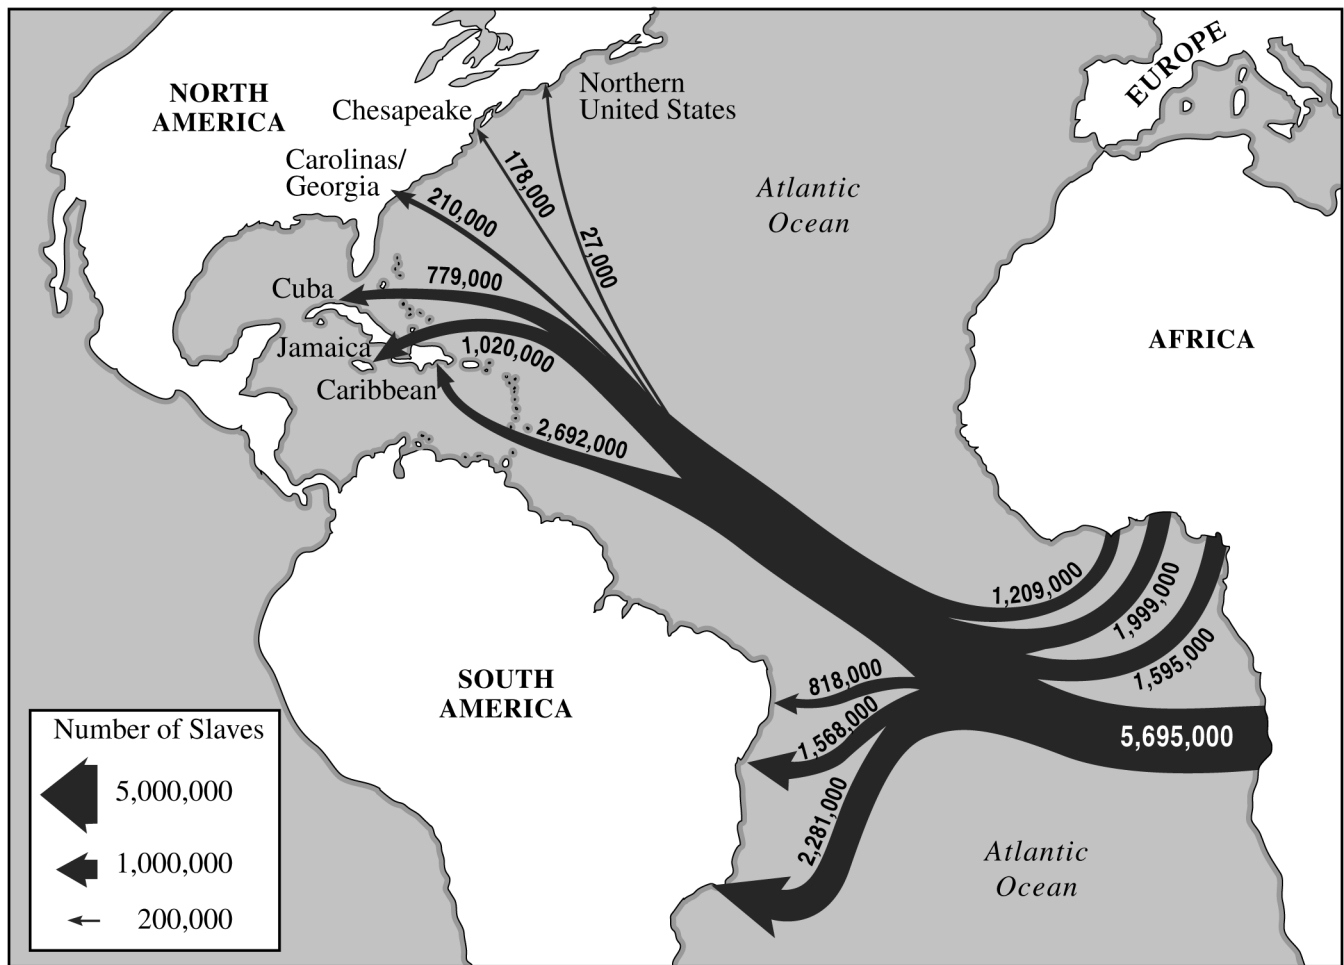

- (A) The Mongol conquests had a more disruptive impact on the Middle East and Central Asia than they had on East Asia.
- (B) The emergence of the Ottoman Empire significantly increased the percentage of major urban centers in Europe.
- (C) The adoption of Champa rice during the Song dynasty significantly increased the share of China's urban population.
- (D) The outbreaks of bubonic plague greatly reduced urban populations across Eurasia.

25. The changes in the distribution of cities in the period 1800–1900 C.E. best illustrate the impact of

- (A) the Atlantic revolutions
- (B) the Industrial Revolution
- (C) the abolition of slavery
- (D) improvements in urban policing and public safety

Questions 26 - 29 refer to the map below.

THE TRANS-ATLANTIC SLAVE TRADE, CIRCA 1450–1900

26. Which of the following best explains the relative volume of trade to different destinations as shown on the map?

- (A) The need for labor in new mining centers
- (B) The traditional use of enslaved soldiers by the Ottoman Empire
- (C) The increasing demand for labor on cash crop plantations
- (D) The growing desire for household servants among emerging commercial elites

27. All of the following were significant environmental effects of the trade illustrated on the map EXCEPT

- (A) the spread of Afro-Eurasian diseases in the Americas
- (B) soil depletion and erosion from intensive agriculture in the Caribbean
- (C) American foods becoming staple crops in Africa
- (D) air pollution resulting from the increased exploitation of fossil fuels

28. Which of the following best describes the impact on African society of the trade depicted on the map?

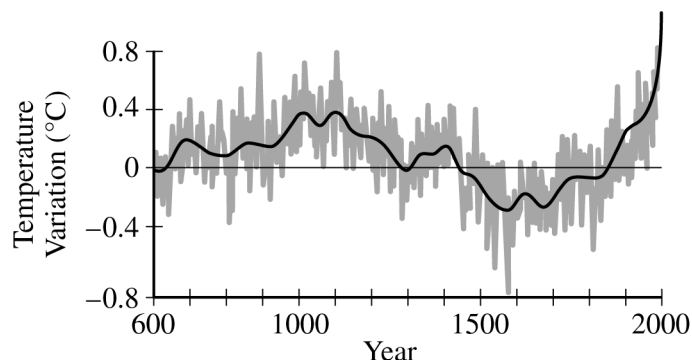

- (A) Gender and family roles were restructured as the male population in West Africa diminished.
- (B) Bantu peoples increasingly migrated southwards and eastwards.
- (C) African societies became increasingly monotheistic as they adopted Islam.
- (D) African states underwent significant urbanization as rural agricultural populations diminished.

29. The trade illustrated by the map contributed most directly to which of the following?

- (A) The Glorious Revolution
- (B) The French Revolution
- (C) The Haitian Revolution
- (D) The Cuban Revolution

Questions 30 - 32 refer to the graph below.

AVERAGE TEMPERATURE CHANGES IN THE NORTHERN HEMISPHERE, 600–2000 C.E.

Source: Adapted from Anders Moberg, et al., *Nature*, vol. 433, (2005): 613-17.

The gray lines indicate temperature variations by year. The black line indicates the long-term temperature change trend.

30. The temperature trend shown on the graph for the period 700–1200 most directly contributed to which of the following developments in Afro-Eurasia?
- (A) Increased invasions of pastoral nomads stemming from receding grasslands in the steppes
 - (B) A significant decline in coastal urban populations because of rising sea levels
 - (C) A decrease in deaths from epidemic diseases
 - (D) Increases in agricultural productivity and trade
31. Historians most often refer to the temperature trend shown on the graph for the period 1400–1800 as the
- (A) Late Glacial Maximum
 - (B) Middle Bronze Age Cold Epoch
 - (C) Iron Age Cold Epoch
 - (D) Little Ice Age
32. Since the late twentieth century many scientists have argued that the temperature trend after 1800 was most directly influenced by which of the following?
- (A) Nuclear power and nuclear weapons
 - (B) Increasingly violent global conflicts
 - (C) Industrialization and pollution
 - (D) Colonialism and exploitation of indigenous labor

Questions 33 - 37 refer to the passage below.

“The Mexican city of Zacatecas is renowned for the enormous quantity of silver that has been extracted from it and continues to be extracted today. At the time of the discovery of the silver, there were many forests and woodlands in this rocky land, all of which have since vanished so that now except for some little wild palms, no other trees remain. Firewood is very expensive in the city because it is brought in carts from a distance of eighteen hours away.

The silver was discovered in the year 1540, in the following way: after the fall of the Aztec Empire, Spanish soldiers remained, spread over the entire country. Since no more towns remained to conquer and since they had so many Indian slaves, they devoted themselves to seeking riches from silver mines. One of these soldiers was Juan de Tolosa, who happened to have an Aztec among his Indian slaves. The Aztec, it is said, seeing his master so anxious to discover mines and to claim silver, told him: ‘If you so desire this substance, I will take you where you can fill your hands and satisfy your greed with it.’

The city houses at least 600 White residents, and most of them are Spaniards. There are about 800 Black slaves and mulattoes*. There are about 1,500 Indians in the work gangs who labor in all types of occupations in the mines.”

Alonso de la Mota y Escobar, Bishop of Guadalajara, Mexico, geographical treatise, 1605

*a person of mixed European and African ancestry

33. Based on the passage, it could be inferred that the high prices of firewood in seventeenth-century Zacatecas were a result of which of the following processes?
- (A) The global decrease in average temperatures after circa 1400 C.E.
 - (B) The depletion of natural resources caused by Aztec chinampa farming
 - (C) The transfer of crops and pathogens during the Columbian Exchange
 - (D) The introduction of European practices of resource extraction
34. The economic activities described in the passage contributed most directly to which of the following?
- (A) The emergence of the first truly global exchange networks
 - (B) The beginning of the process of industrialization
 - (C) The establishment of the first chartered and limited-liability commercial companies
 - (D) The rapid growth of China’s population under the Song and Ming dynasties

35. A historian could best use the passage as evidence for which of the following?
- (A) The Spanish authorities' preference for Spanish-born rather than American-born individuals in administrative appointments
 - (B) The resistance encountered in the process of attempting to convert the indigenous population to Christianity
 - (C) The creation of a new political and economic elite in the immediate aftermath of the European conquest
 - (D) The disappearance of the Amerindian population due to the spread of infectious Eurasian diseases
36. The ethnic makeup of Zacatecas, as described in the passage, can best be used as evidence of which of the following?
- (A) The dependence of colonial economies on coerced labor
 - (B) The social tensions that gave rise to the Latin American wars of independence
 - (C) The development of indentured servitude as an alternative to slavery
 - (D) The emergence of syncretic religious belief systems, such as Santería and Candomblé
37. Based on the description of the discovery of silver in Zacatecas in the second paragraph, which of the following conclusions about Mota y Escobar is best supported?
- (A) He had no firsthand knowledge of Mexico.
 - (B) He was an opponent of the practice of slavery.
 - (C) He was critical of the motivations of the Spanish conquistadors.
 - (D) He questioned the economic usefulness of silver mining.

Questions 38 - 40 refer to the passage below.

“Let the blessings of Allah be upon Muhammad and his companions universally. In the year 1640 C.E. I wanted to behold the mystics of every sect, to hear the lofty expressions of monotheism, and to cast my eyes upon many books of mysticism. I, therefore, examined the Book of Moses, the Gospels, and the Psalms.

Among the Hindus, the best of their heavenly books, which contain all the secrets of pure monotheism, are called the Upanishads. Because I do not know Sanskrit, I wanted to make an exact and literal translation of the Upanishads into Persian*. For the Upanishads are a treasure of monotheism and there are few thoroughly conversant with them even among the Indians. Thereby I also wanted to make the texts accessible to Muslims.

I assembled Hindu scholars and ascetics to help with the translation. Every sublime topic that I had desired or thought and had looked for and not found, I obtained from these most ancient books, the source and the fountainhead of the ocean of religious unity, in conformity with the holy Qur'an.”

*Persian was the primary language used at the Mughal court.

Dara Shikoh, son of the Mughal ruler Shah Jahan, account of the translation of the Upanishads into Persian, 1657 C.E.

38. Based on the passage, which of the following most strongly influenced Dara Shikoh's religious views?
- (A) Shi'ism
 - (B) Sufism
 - (C) Buddhism
 - (D) Zoroastrianism
39. Dara Shikoh's intellectual collaborations as described in the passage are most consistent with which of the following policies of imperial states such as the Mughal Empire in the period 1450–1750 C.E.?
- (A) Recruiting subject peoples for imperial expansion through military conscription
 - (B) Attempting to build support for imperial rule by accommodating religious and ethnic diversity
 - (C) Sponsoring the development of religious architecture to legitimize imperial rule
 - (D) Attempting to enforce imperial power by requiring cultural assimilation

40. Dara Shikoh's views about the value of the Upanishads, as expressed in the second paragraph, are most likely based on which of the following features of Hinduism?

- (A) The belief in the cycle of rebirth
- (B) The belief in an ultimate universal principle
- (C) The belief in numerous gods and goddesses
- (D) The belief in the potential for the liberation of the soul

Questions 41 - 44 refer to the image below.

**A SKETCH BY JAN BRANDES, DUTCH LUTHERAN MINISTER LIVING IN JAKARTA,
INDONESIA, 1784**

Rijksmuseum, Amsterdam, The Netherlands / Bridgeman Images

The sketch shows the artist's son Johnny and Flora, an enslaved Indonesian household servant.

41. Which of the following developments facilitated the family situation portrayed in Brandes' sketch?
- (A) The recruitment of new bureaucratic elites by Muslim states in Southeast Asia
 - (B) The expansion of European colonial empires in Southeast Asia
 - (C) The changes in family demographic structure resulting from the trans-Atlantic slave trade
 - (D) The creation of new gender hierarchies in emerging maritime empires
42. The domestic labor of the enslaved woman in the sketch is most similar to the predominant form of slavery in which of the following regions?
- (A) Africa
 - (B) The Caribbean
 - (C) Russia
 - (D) South America
43. Which of the following would most directly challenge the labor system portrayed in the sketch?
- (A) Trade unionism
 - (B) The Enlightenment
 - (C) Social Darwinism
 - (D) Marxism
44. In the late nineteenth century, which of the following would most motivate the Dutch to continue to expand their presence in Indonesia?
- (A) The acquisition of natural resources for manufacturing
 - (B) The growing competition with Spanish and Portuguese colonial empires
 - (C) The example of Japanese modernization during the Meiji Restoration
 - (D) The emergence of nationalism in Indonesia

Questions 45 - 47 refer to the photograph below.

CHARLES GUSTAVE SPITZ, FRENCH PHOTOGRAPHER, *CELEBRATING BASTILLE DAY IN
TAHITI,** PHOTOGRAPH TAKEN FOR PUBLICATION IN THE FRENCH PRESS, 1889**

Mark and Carolyn Blackburn Collection of Polynesian Art/Bridgeman Images

*French national holiday celebrating the 1789 French Revolution

**French colonial territory in Polynesia, the South Pacific

45. Which of the following best describes the likely purpose of the photograph?
- (A) To document the changes in Polynesian political hierarchies and gender roles brought about by imperialism
 - (B) To illustrate the photographer's belief that Tahitians were racially inferior to Europeans
 - (C) To record the rapidly vanishing customs and institutions of native Polynesians
 - (D) To reassure the French public of the civilizing effects of colonial rule and the loyalty of colonial populations
46. The photograph best supports which of the following inferences about French colonial rule in Tahiti in the 1880s?
- (A) Colonial authorities attempted to impart a sense of French national identity to native Tahitians.
 - (B) Tahiti provided France with valuable sources of raw materials as well as with markets for French manufactured goods.
 - (C) The spread of Enlightenment ideas and anticolonial movements led many Tahitians to demand independence from France.
 - (D) French control of Tahiti was under threat from expanding rival colonial empires in the Pacific, such as Great Britain, Japan, and the United States.
47. Which of the following events would have been most likely to produce a cultural context similar to the one depicted in the image?
- (A) The spread of Marxist ideas
 - (B) The Taiping Rebellion in China
 - (C) The scramble for Africa
 - (D) The unification of Germany

Questions 48 - 51 refer to the passage below.

“Our country needs a large population to utilize and exploit its land and natural resources. In general, the way to increase a country’s population is to increase the number of births and to decrease the number of deaths. Some European states adopt a number of methods to increase their birth rates: (1) additional government services are provided to people who are married and have many children; (2) discounts and tax rebates on expenses related to the education of children are provided; (3) awards are given to families with many children.

In Iran, due to the special impact of our national morals and religious traditions, families have many children. Therefore, the best means to increase the Iranian population is to take measures to decrease the death rate. More governmental physicians and health officials are needed to prevent the wasting of the country’s human capital.

Due to the lack of literature on child rearing available to Iranian mothers, and due to the absence of sufficient means for the treatment of ill children, more than 50% of all children born to Iranian families die before the age of seven. Through instructions and acquainting people with the literature on child rearing, as well as by providing families with free medical treatment, at least 90% of children could live to reach adolescence. In this context, patriotic women’s organizations must carry out serious and efficient actions to help invigorate the management of the country’s health.”

Fereydun Keshavarz, Iranian pediatrician, article published in an Iranian newspaper, 1937

48. Keshavarz’ article best reflects the influence of which of the following ideologies on members of Iran’s educated elite?
- (A) Communism
 - (B) Political Islam
 - (C) Nationalism
 - (D) Anti-imperialism
49. As described by Keshavarz in the first paragraph, which of the following would best explain why European countries were implementing policies to increase the size of their populations?
- (A) They had adopted Marxist economic philosophy.
 - (B) They wanted to address the effects of the First World War and mobilize for future conflicts.
 - (C) They needed to employ the workers who had lost their jobs in the Great Depression.
 - (D) They feared a popular backlash against the economic and social costs of the welfare state.

50. In the late twentieth century, which of the following factors would most directly enable governments around the world to achieve the public policy goals outlined in Keshavarz' article?
- (A) The spread of radical nationalist and religious movements
 - (B) The political and legal emancipation of women
 - (C) Advances in medicine, such as vaccines and antibiotics
 - (D) Advances in communication, such as television and the Internet
51. Keshavarz' analysis in the third paragraph of the difficulties of growing Iran's population best reflects which of the following demographic realities in the early twentieth century?
- (A) Effective forms of birth control gave women greater control over their fertility.
 - (B) Diseases associated with poverty and underdevelopment were still prevalent in most world regions.
 - (C) Military conflicts led to population decreases in many countries, followed by postwar baby booms.
 - (D) The Green Revolution dramatically increased agricultural productivity and led to rapid population growth.

Questions 52 - 55 refer to the poem below.

“Mr. President, I am writing you a letter
which maybe you’ll read if you have the time.

I have just received my army recruitment papers
to report for duty in the war* by Wednesday evening.

Mr. President, I do not want to do that;
I was not put on this earth to kill wretched people living far away.

I must tell you—it’s not to make you mad—
but I’ve made my decision: I am going to desert. . . .

I will hit the road and beg for my life
all over France—and I will call out to the people:

‘Refuse to obey! Refuse to do it!
Don’t go to fight in the war! Just say no!’

If someone’s blood must be shed,
Then shed yours, Mr. President! Lead by example!

And if you decide to hunt me down, warn your police
that I will be unarmed, and that they can go ahead and shoot.”

*a reference to the war in French Vietnam

Boris Vian, French poet, “The Deserter,” 1954

52. The response by the author to the idea of being sent to Vietnam to “kill wretched people living far away” best exemplifies which of the following late-twentieth-century global processes?
- (A) The globalization of consumer culture
 - (B) Individuals challenging established racial and cultural assumptions
 - (C) Popular disillusionment with free-market economic policies
 - (D) The proliferation of new weapons and military technologies
53. Late-twentieth-century military conflicts such as the one referred to in the poem typically resulted from which of the following?
- (A) Mercantilist colonial policies
 - (B) Social Darwinist philosophy
 - (C) Negotiated decolonization
 - (D) Nationalist resistance to imperialism

54. Which of the following aspects of the political context of the 1950s best explains the author's view of colonial wars expressed in the poem?
- (A) The memory of the destructive total wars of the early twentieth century
 - (B) The intensification of anticommunist sentiment in the context of the Cold War
 - (C) The beginning of European economic and political integration
 - (D) The influence of United States mass media
55. The method of achieving political change advocated in the poem best illustrates which of the following practices used by reform movements in the twentieth century?
- (A) Nationalization and collectivization
 - (B) Violence against civilians
 - (C) Civil disobedience
 - (D) Consumer boycotts

END OF PART A

IF YOU FINISH BEFORE TIME IS CALLED,

YOU MAY CHECK YOUR WORK ON PART A.

DO NOT GO ON TO PART B UNTIL YOU ARE TOLD TO DO SO.

MAKE SURE YOU HAVE DONE THE FOLLOWING.

- **PLACED YOUR AP NUMBER LABEL ON YOUR MULTIPLE-CHOICE ANSWER SHEET**
- **WRITTEN AND GRIDDED YOUR AP NUMBER CORRECTLY ON YOUR MULTIPLE-CHOICE ANSWER SHEET**
- **TAKEN THE AP EXAM LABEL FROM THE FRONT OF THIS BOOKLET AND PLACED IT ON YOUR MULTIPLE-CHOICE ANSWER SHEET**

WORLD HISTORY

SECTION I, Part B

Time—40 minutes

Directions: Answer Question 1 and Question 2. Answer either Question 3 or Question 4.

Write your responses in the Section I, Part B: Short-Answer Response booklet. You must write your response to each question on the lined page designated for that response. Each response is expected to fit within the space provided.

In your responses, be sure to address all parts of the questions you answer. Use complete sentences; an outline or bulleted list alone is not acceptable. You may plan your answers in this exam booklet, but no credit will be given for notes written in this booklet.

Use the passage below to answer all parts of the question that follows.

“Buddhism, introduced in Japan as part of Chinese culture, was actively supported by the rulers. This political support furthered the mixing of religious beliefs in Japan, since the emperors were also the highest functionaries in the national religion, Shinto.* Soon it became common to read the Buddhist *sutras* before shrines of the Shinto *kami* spirits.

It became a common practice to count the *kami* among those beings who—like humans—could find salvation through Buddhist prayer and ritual. The next stage was to give the title of *bodhisattva* to these Shinto *kami*, who were thought to have arrived at an enlightened state through the practice of Buddhism.”

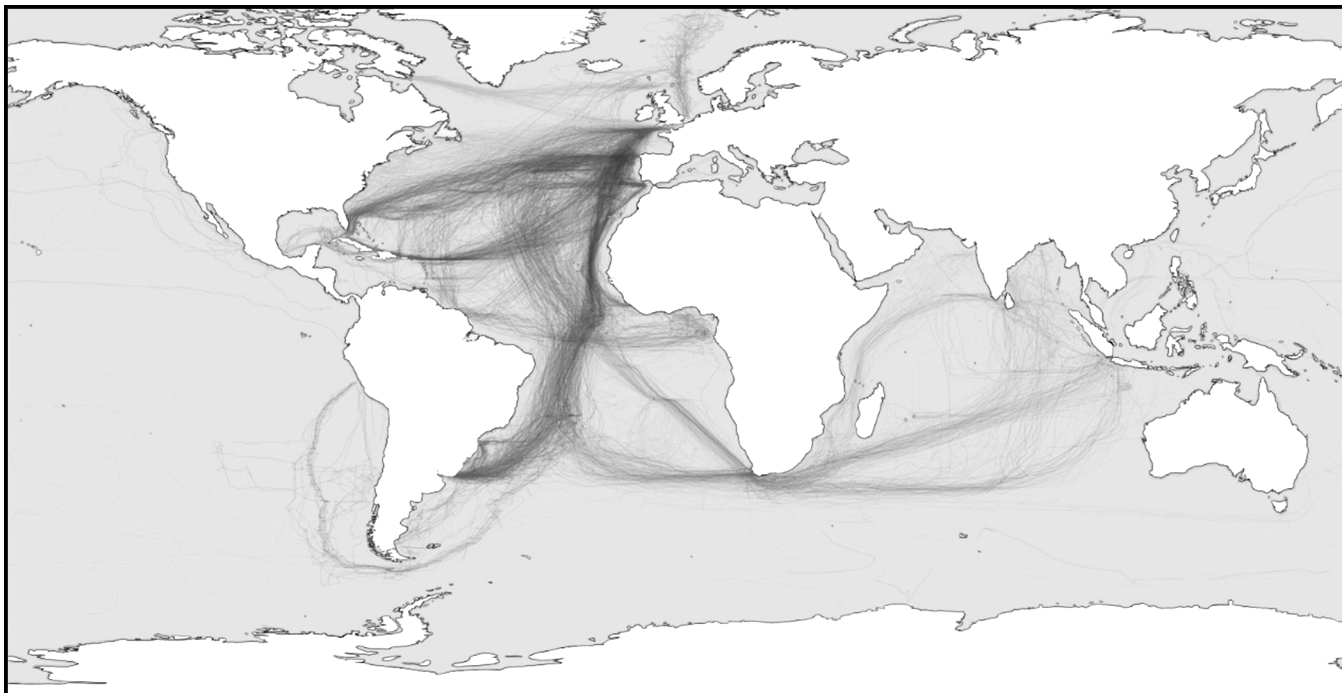

*The traditional religion of Japan, combining elements of animism and ancestor worship

Hartmut Rotermund, European historian of Japan, article in an encyclopedia of world religions and mythologies, 1991

1. a) Explain how the interactions described in the article illustrate the process of religious syncretism.
- b) Explain ONE similar example of religious syncretism in a region other than Japan.
- c) Explain ONE global process after 1980 that contributed to historians’ increased interest in studying the type of cross-cultural interactions described in the passage.

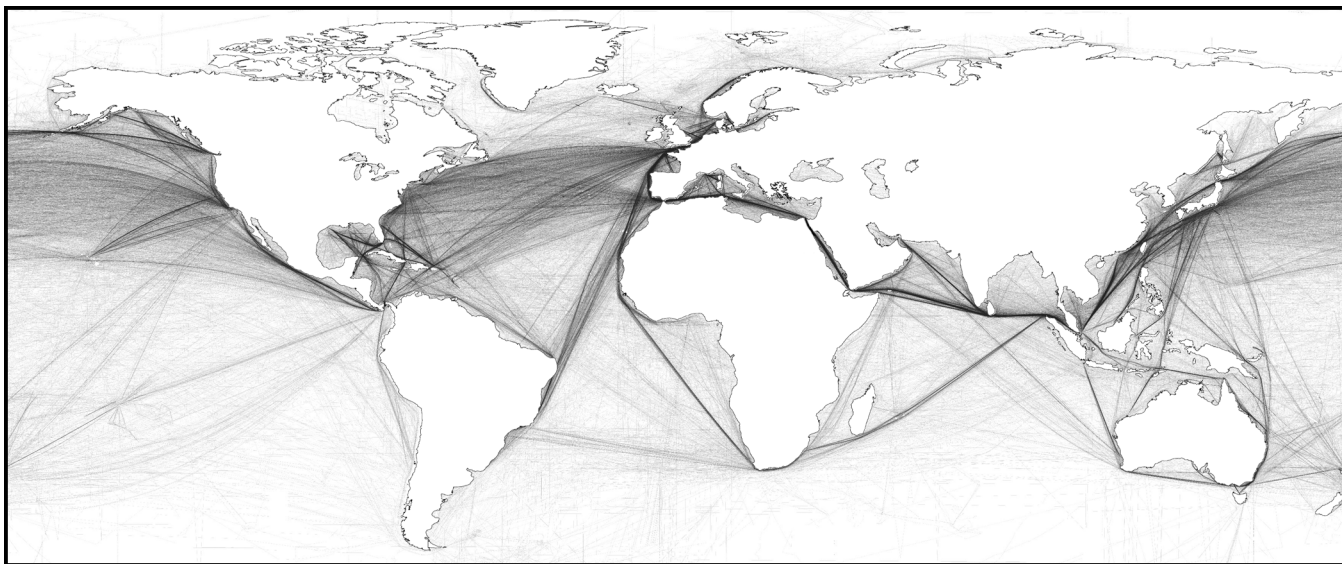

Use the two maps below to answer all parts of the question that follows.

Map 1: BRITISH, SPANISH, AND DUTCH TRADE ROUTES AS SHOWN BY SHIP LOGS, 1750-1800. Heavier shading indicates more frequently used routes.

James Cheshire 2012. Data provided by CLIWOC

Map 2: COMMERCIAL SHIPPING LANES, 2010. Heavier shading indicates more frequently used routes.

Source: <http://www.nceas.ucsb.edu/globalmarine/impacts>

2. a) Explain ONE significant reason for changes in the patterns of global economic interactions from circa 1750 to circa 2000, as illustrated by the two maps.
- b) Explain ONE significant reason for continuities in the patterns of global economic interactions from circa 1750 to circa 2000, as illustrated by the two maps.
- c) Explain ONE limitation of using the maps to measure global interactions from circa 1750 to circa 2000.

Question 3 or 4

Directions: Answer either Question 3 or Question 4.

Answer all parts of the question that follows.

3. a) Explain ONE similarity in the way that empires in Afro-Eurasia maintained their power in the period 600 B.C.E. to 600 C.E.
- b) Explain ONE difference in the way that two specific empires in Afro-Eurasia maintained their power in the period 600 B.C.E. to 600 C.E.
- c) Explain ONE development that limited the expansion of empires in the period 600 B.C.E. to 600 C.E.

Answer all parts of the question that follows.

4. a) Identify ONE technological transfer between world regions that affected state power in the period 1450–1750.
- b) Explain ONE similarity in the way that technology affected state power in Asia and in the way that technology affected state power in Europe in the period 1450–1750.
- c) Explain ONE difference in the way that technology affected state power in Asia and in the way that technology affected state power in Europe in the period 1450–1750.

WORLD HISTORY

SECTION II

Total Time—1 hour and 40 minutes

Question 1 (Document-Based Question)

Suggested reading and writing time: 1 hour

It is suggested that you spend 15 minutes reading the documents and 45 minutes writing your response.

Note: You may begin writing your response before the reading period is over.

Directions: Question 1 is based on the accompanying documents. The documents have been edited for the purpose of this exercise.

In your response you should do the following.

- Respond to the prompt with a historically defensible thesis or claim that establishes a line of reasoning.
- Describe a broader historical context relevant to the prompt.
- Support an argument in response to the prompt using at least six documents.
- Use at least one additional piece of specific historical evidence (beyond that found in the documents) relevant to an argument about the prompt.
- For at least three documents, explain how or why the document's point of view, purpose, historical situation, and/or audience is relevant to an argument.
- Use evidence to corroborate, qualify, or modify an argument that addresses the prompt.

1. Evaluate the extent to which the experience of the First World War changed relationships between Europeans and colonized peoples.

Document 1

Source: John Chilembwe, native of British Nyasaland (present-day Malawi) and ordained Baptist minister, letter sent to the *Nyasaland Times*,* November 1914.

We have been invited to shed our innocent blood in this world war which is now in progress. In the past, it was said indirectly that Africa had nothing to do with the civilized world. But now we find that the poor African has already been plunged into the great war. The masses of our people are ready to put on uniforms, ignorant of what they have to face or why they have to face it. We natives have been loyal since the commencement of this [British] Government, and in all departments of Nyasaland the welfare of the British would have been incomplete without our loyalty. But in time of peace the Government failed to help the underdog. In time of peace everything was for Europeans only. But in time of war it has been found that we are needed to share hardships and shed our blood in equality. The poor Africans who have nothing to win in this present world are invited to die for a cause which is not theirs.

*The letter was published but later retracted by the newspaper's British editors, and the entire issue was subsequently withdrawn from circulation and destroyed by the Nyasaland colonial government.

Document 2

Source: Kalyan Mukerji, Indian officer in the British Indian army that was fighting against the Ottoman army in Iraq, letter to a friend in India, October 1915. The letter was intercepted by British mail censors and was not delivered.

England is the educator. The patriotism that the English have taught us, the patriotism that all civilized nations have celebrated—that patriotism is responsible for all this bloodshed. We see now that all that patriotism means is snatching away another man's country. To show patriotism, nationalism, by killing thousands and thousands of people all to snatch away a bit of land, well it's the English who have taught us this.

The youths of our country, seeing this, have started to practice this brutal form of nationalism. Therefore, killing a number of people, throwing bombs—they have started doing these horrific things. Shame on patriotism. As long as this narrow-mindedness continues, bloodshed in the name of patriotism will not cease. Whether a man throws a bomb from the roof-top or whether fifty men, under orders from their officer, start firing from a cannon-gun at the front line—the cause of this bloodshed, this madness, is the same.

Document 3

Source: French postcard, showing colonial troops in France and French civilians, 1915. The text of the card says: "Our Black troops in the Great War 1914–1915 [say]: 'What are we doing here?! . . . We came to kill savages*. . . the German ones!'"

Keystone-France / Contributor

*a reference to the fact that German wartime propaganda often depicted colonial troops in the French and British armies as savages

Document 4

Source: Behari Lal, Indian soldier in the British Indian army on the Western Front, letter to his family, November 1917. The letter was intercepted by British mail censors and was not delivered.

There is no likelihood of our getting rest during the winter. I am sure German prisoners would not be worse off in any way than we are. I had to go three nights without sleep, as I was on a truck, and the Europeans on the truck did not like to sleep next to me because I am an Indian. I am sorry the hatred between Europeans and Indians is increasing instead of decreasing, and I am sure the fault is not with the Indians. I am sorry to write this, which is not a hundredth part of what is in mind, but this increasing hatred and continued ill-treatment has compelled me to give you a hint.

Document 5

Source: Popular Egyptian protest song sung during the Egyptian revolt of 1919 against the British occupation of Egypt. The revolt led to Great Britain's recognition of Egypt's nominal independence in 1922.

Laborers and soldiers were forced to travel, leaving their land

They headed to the battlefields and the trenches!

And now the British blame us for revolting?

Behold the calamities you have caused! Had it not been for our laborers,

You and your troops would have been helpless in the desert sand!

Oh, you who are in authority, why didn't you go all alone to the Dardanelles?*

Oh Maxwell** now you feel the hardships, how does it feel?

The Egyptian is resilient; and now he is willing and able and can do anything.

His achievements are worthy of praise, and he will do his all to gain a constitution.

We are the sons of Pharaohs, which no one can dispute. . . .

*The Dardanelles, a narrow strait of water in northwest Turkey, was the site of the famous 1915–1916 Gallipoli campaign. During the campaign, Allied forces attacked the Ottoman Empire and were defeated.

**British commander in Egypt in 1915

Document 6

Source: Hubert Reid, Jamaican veteran of a West Indian regiment in the British Army and leader of a labor union formed to defend the rights of Jamaican war veterans, petition to the British colonial government, 1935.

It has taken 17 years of countless petitions, marching through the streets of Kingston,* as well as agitations before we were given worthless lands in some of the most remote parts of the island without even a well-needed five-pound bill to assist us in making a shabby shelter, much less in trying to cultivate the place for an existence. In some cases, not even wild birds would care to inhabit the worthless lands that we were given. Not even an inch is suitable for cultivation, and as far as roads are concerned, the inaccessibility of the places renders that impossible.

*the Jamaican capital

Document 7

Source: Nar Diouf, African veteran of a West African regiment in the French army, interview for an oral history project, 1982.

My experience in the war gave me many lasting things. I demonstrated my dignity and courage, and I won the respect of my people and the [French colonial] government. In the years immediately after the war, whenever the people of my village had something to contest with the French—and they didn't dare do it themselves because they were afraid—I would go and take care of it for them. And many times when people had problems with the government, I would go with my war decorations and arrange the situation for them. Because whenever the French saw your decorations, they knew that they are dealing with a very important person. So I gained this ability—to obtain justice over the Europeans—from the war.

For example, one day a French military doctor was in our village, and there was a small boy who was blind. The boy was walking, but he couldn't see and he bumped into the Frenchman. And the Frenchman turned and pushed the boy down on the ground. And when I saw this, I came and said to the Frenchman: "Why did you push the boy? Can't you see that he is blind?" And he looked at me and said: "Oh, pardon, pardon. I did not know. I will never do it again, excuse me!" But before the war, it would not have been possible for me to interact like that with a European, no matter what he had done.

END OF DOCUMENTS FOR QUESTION 1

Question 2, 3, or 4 (Long Essay)
Suggested writing time: 40 minutes

Directions: Answer Question 2 or Question 3 or Question 4.

In your response you should do the following.

- Respond to the prompt with a historically defensible thesis or claim that establishes a line of reasoning.
- Describe a broader historical context relevant to the prompt.
- Support an argument in response to the prompt using specific and relevant examples of evidence.
- Use historical reasoning (e.g., comparison, causation, continuity or change over time) to frame or structure an argument that addresses the prompt.
- Use evidence to corroborate, qualify, or modify an argument that addresses the prompt.

2. Different social, technological, and environmental factors led to the development of complex civilizations in the period before 600 B.C.E.

Develop an argument that evaluates how one or more factors led to the development of complex civilizations in this time period.

3. In the period 1450–1750, oceanic voyages resulted in the Columbian Exchange, which transformed the Eastern and Western Hemispheres.

Develop an argument that evaluates how the Columbian Exchange affected peoples in Afro-Eurasia in this time period.

4. In the period 1900 to 2001, rapid advances in science and technology took place.

Develop an argument that evaluates how advances in science and technology affected society in this time period.

WHEN YOU FINISH WRITING, CHECK YOUR WORK ON SECTION II IF TIME PERMITS.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Short-Answer Question 1

Use the passage below to answer all parts of the question that follows.

“Buddhism, introduced in Japan as part of Chinese culture, was actively supported by the rulers. This political support furthered the mixing of religious beliefs in Japan, since the emperors were also the highest functionaries in the national religion, Shinto.* Soon it became common to read the Buddhist *sutras* before shrines of the Shinto *kami* spirits.

It became a common practice to count the *kami* among those beings who—like humans—could find salvation through Buddhist prayer and ritual. The next stage was to give the title of *bodhisattva* to these Shinto *kami*, who were thought to have arrived at an enlightened state through the practice of Buddhism.”

*The traditional religion of Japan, combining elements of animism and ancestor worship

Hartmut Rotermund, European historian of Japan, article in an encyclopedia
of world religions and mythologies, 1991

1. a) Explain how the interactions described in the article illustrate the process of religious syncretism.
- b) Explain ONE similar example of religious syncretism in a region other than Japan.
- c) Explain ONE global process after 1980 that contributed to historians’ increased interest in studying the type of cross-cultural interactions described in the passage.

0–3 points

Score 3

Response accomplishes all three tasks set by the question.

Score 2

Response accomplishes two of the tasks set by the question.

Score 1

Response accomplishes one of the tasks set by the question.

Score 0

Response accomplishes none of the tasks set by the question.

Score NR

No response. Response is completely blank.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Short-Answer Question 1 (continued)

Scoring Guide

0–3 points

- ONE point for explaining how the interactions described in the article illustrate the process of religious syncretism.
- ONE point for explaining one similar example of religious syncretism in a region other than Japan.
- ONE point for explaining one global process after 1980 that contributed to historians' increased interest in studying the type of cross-cultural interactions described in the passage.

Scoring Notes

Examples of responses to part A that would earn credit:

- The mixing of Shinto and Buddhist religious beliefs illustrates the process of religious syncretism.
- The reading of Buddhist *sutras* before the shrines of the Shinto *kami* shows a blending of beliefs.
- The association of Shinto *kami* as Buddhist *bodhisattvas* in Japanese religious practices illustrates the process of religious syncretism because it shows the blending of religious traditions.

Examples of responses to part B that would earn credit:

- Chinese Buddhism is an example of religious syncretism because it contains Daoist and Confucian influences.
- The blending of shamanist and Buddhist beliefs in Korea in the fourth and fifth centuries C.E. is an example of religious syncretism.
- Gnosticism is an example of religious syncretism, as it combined elements of Jewish, Christian, and pagan Greco-Roman beliefs.
- Manichaeism was arguably the most syncretic premodern religion, as it combined elements of Buddhism, Zoroastrianism, Christianity, and Greco-Roman religions into a single belief system.
- The development of Sikhism in India is an example of religious syncretism because its beliefs show both Hindu and Islamic influences.
- Voudun, Santería, and Candomblé are syncretic religions that blend elements of African, Christian, and indigenous American religious beliefs and practices.
- The Bahá'í religion that originated in Iran is an example of a syncretic belief system because it combines elements from many of the world's major religious traditions.

Examples of responses to part C that would earn credit:

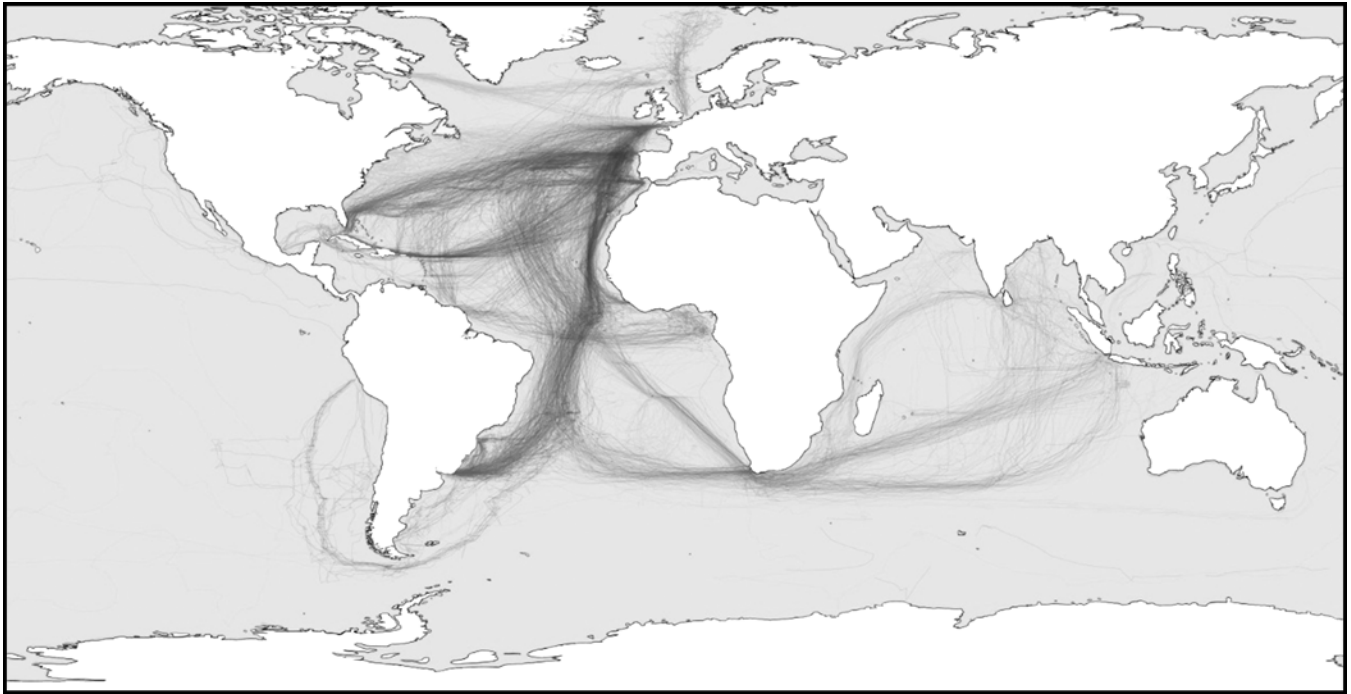

- Historians became more interested in studying religious syncretism because of increasing globalization and the resulting fundamentalist reactions to Westernization.
- The growing popularity of Asian religious practices such as Yoga and Zen Buddhism in the West has increased Western historians' interest in religious syncretism.
- Historians became increasingly interested in studying syncretism after the emergence of social movements that challenged traditional religious teachings about gender and social hierarchy.
- Religious conflicts in multi-confessional regions such as Bosnia increased historians' interest in religious syncretism as they tried to understand how different religious groups interacted and influenced each other.

Response accomplishes one of the tasks set by the question.

Score 0

Response accomplishes none of the tasks set by the question.

Score NR

No response. Response is completely blank.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Short-Answer Question 2 (continued)

Scoring Guide

0–3 points

- ONE point for explaining one significant reason for changes in the patterns of global economic interactions from circa 1750 to circa 2000, as illustrated by the two maps.
- ONE point for explaining one significant reason for continuities in the patterns of global economic interactions from circa 1750 to circa 2000, as illustrated by the two maps.
- ONE point for explaining one limitation of using the maps to measure global interactions from circa 1750 to circa 2000.

Scoring Notes

Examples of responses to part A that would earn credit:

- Increasing globalization is the most significant reason for the changes in global interactions between 1750 and 2000.
- The industrialization of shipping is a significant reason for the changes in global interactions between 1750 and 2000.
- The expansion of transnational and multinational corporations is a significant reason for increased shipping between 1750 and 2000 because companies now had a presence all over the world.
- The creation of the Suez and Panama canals is a significant reason for the changes in the patterns of shipping shown on the maps as both canals considerably reduced the amount of time needed for ships to reach destinations.
- The maps show a significant shift away from a Eurocentric global economy as shipping volumes to East Asia and the Pacific increased considerably.

Examples of responses to part B that would earn credit:

- One continuity in the patterns of global economic interactions from 1750 to 2000 is that shipping remains crucial to global trade.
- One continuity in the patterns of global economic interactions from 1750 to 2000 is that shipping volumes to and from Europe and North America were still heavier than anywhere else in the world, reflecting the fact that they are still economically dominant.
- One continuity in the patterns of global economic interactions from 1750 to 2000 is that shipping patterns in the Indian Ocean and from Europe to South America have remained relatively consistent.

Examples of responses to part C that would earn credit:

- One major limitation of using the maps to measure global interactions from 1750 to 2000 is that land and air transport are not shown.
- One major limitation of using the maps to measure global interactions from 1750 to 2000 is that the first map only includes European ships and does not even shown all European shipping.
- One major limitation of using the maps to measure global interactions from 1750 to 2000 is that the maps are only snapshots of relatively brief periods, as no data from the nineteenth or twentieth centuries are included.
- One major limitation of using the maps to measure global interactions from 1750 to 2000 is that the value and quantity of the goods traded are not shown, making it difficult to determine which regions or countries may benefit more from the trade routes.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Short-Answer Question 3 (continued)

Scoring Guide

0–3 points

- ONE point for explaining one similarity in the way that empires in Afro-Eurasia maintained their power in the period 600 B.C.E. to 600 C.E.
- ONE point for explaining one difference in the way that two specific empires in Afro-Eurasia maintained their power in the period 600 B.C.E. to 600 C.E.
- ONE point for explaining one development that limited the expansion of empires in the period 600 B.C.E. to 600 C.E.

Scoring Notes

Examples of responses to part A that would earn credit:

- Most Afro-Eurasian empires in the period 600 B.C.E.–600 C.E. maintained their power by levying taxes and funding large armies.
- Many Afro-Eurasian empires in the period 600 B.C.E.–600 C.E. maintained their power by creating elaborate bureaucracies.
- Many Afro-Eurasian empires in the period 600 B.C.E.–600 C.E. maintained their power by using, religion, art, or architecture to boost their legitimacy.
- Many Afro-Eurasian empires in the period 600 BCE to 600 CE maintained their power by retaining the loyalty of ethnic and religious minorities by incorporating them into their militaries or bureaucracies, granting them political autonomy, creating separate legal systems, garrisoning regions or cities, or promoting a common belief system or religion such as Christianity or Confucianism.

Examples of responses to part B that would earn credit:

- The Roman Empire under Constantine and his successors promoted Christianity as the state religion, while the Persian Empire promoted Zoroastrianism.
- The Roman state used a republican system of government to maintain its empire before Augustus, while the Mauryan dynasty under Ashoka used monarchy.
- While the Roman Empire was active in ensuring a flourishing seaborne trade with India, the Persian states focused more on securing their status as “middle men” of the overland luxury goods trade between China and western Eurasia.
- While sedentary empires such as the Han developed complex bureaucracies staffed with local officials, nomadic empires such as the Xiongnu, the Kushan, or the Türk either developed fairly complex administrations or relied on bureaucracies left over from a conquered sedentary society.

Examples of responses to part C that would earn credit:

- Nomadic invasions limited the ability of empires to maintain their power in the period 600 B.C.E.–600 C.E.
- Invasions by the Goths and the Huns limited the expansion of the Roman Empire.
- Rebellions, such as the Yellow Turban revolt in Han China, limited the ability of empires to maintain their power in the period 600 B.C.E.–600 C.E.
- The rise of warlords, such as in the late second and early third centuries C.E. in Han China, limited the ability of empires to maintain their power in the period 600 B.C.E.–600 C.E.
- The incompetence of many Roman emperors such as Nero limited the ability of the empire to maintain its power.
- The overextension of the Roman Empire led to its inability to maintain political power in border regions.

Short-Answer Question 4

Answer all parts of the question that follows.

4. a) Identify ONE technological transfer between world regions that affected state power in the period 1450–1750.

b) Explain ONE similarity in the way that technology affected state power in Asia and in the way that technology affected state power in Europe in the period 1450–1750.

c) Explain ONE difference in the way that technology affected state power in Asia and in the way that technology affected state power in Europe in the period 1450–1750.

0–3 points

Score 3

Response accomplishes all three tasks set by the question.

Score 2

Response accomplishes two of the tasks set by the question.

Score 1

Response accomplishes one of the tasks set by the question.

Score 0

Response accomplishes none of the tasks set by the question.

Score NR

No response. Response is completely blank.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Short-Answer Question 4 (continued)

Scoring Guide

0–3 points

- ONE point for explaining one technological transfer between world regions that affected state power in the period 1450–1750.
- ONE point for explaining one similarity in the way that technology affected state power in Asia and in the way that technology affected state power in Europe in the period 1450–1750.
- ONE point for explaining one difference in the way that technology affected state power in Asia and in the way that technology affected state power in Europe in the period 1450–1750.

Scoring Notes

Examples of responses to part A that would earn credit:

- The transfer of gunpowder between regions affected state power in the period 1450–1750.
- The transfer of shipbuilding technologies between regions affected state power in the period 1450–1750.
- The transfer of maritime technologies such as the compass or astrolabe between regions affected state power in the period 1450–1750.

Examples of responses to part B that would earn credit:

- One similarity between how technology affected state power in Asia and Europe in the period 1450–1750 was that gunpowder allowed states such as Spain, the Ottoman Empire, and the Mughal Empire to expand their territories.
- The compass allowed Asian and European states to engage in long-distance maritime trade and thereby increase state revenue and power.
- Improvements in agricultural or manufacturing technologies allowed Asian and European states to improve production, thereby expanding tax revenues and state power.

Examples of responses to part C that would earn credit:

- Differences in maritime technology allowed European states to create transoceanic empires in the period 1450–1750, while Asian states mainly engaged in overland expansion.
- The development of the printing press in Europe and the emergence of numerous centers of printing that produced vast amounts of literature often led to challenges to the power of European states, to an extent not seen in Asia.
- Differences in the quality of manufacturing technology between China, India, and Europe in the period 1450–1750 led to large trade surpluses for China and India and forced Europeans to focus on importing Asian goods rather than exporting European goods to Asia, strengthening the Asian economies and adversely affecting the European state economic power.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question

Maximum Possible Points: 7

“Evaluate the extent to which the experience of the First World War changed relationships between Europeans and colonized peoples.”

Points	Rubric	Notes
A: Thesis/Claim (0-1)	Responds to the prompt with a historically defensible thesis/claim that establishes a line of reasoning. (1 point) <i>To earn this point, the thesis must make a claim that responds to the prompt rather than restating or rephrasing the prompt. The thesis must consist of one or more sentences located in one place, either in the introduction or the conclusion.</i>	The thesis must take a position on the extent to which the experience of the First World War changed relationships between Europeans and colonized peoples. <i>Examples:</i> • “Although many people in the colonies at first responded patriotically to the call to arms, their experiences during the war led to disillusionment and questioning of the colonial order.” (<i>responds to the prompt with an evaluative claim that establishes a line of reasoning</i>) • “The experience of the First World War greatly changed the relationship between Europeans and colonized peoples because the war showed that Europeans needed colonial troops to fight their wars.” (<i>responds to the prompt with a minimally acceptable claim that establishes a line of reasoning</i>)
B: Contextualization (0-1)	Describes a broader historical context relevant to the prompt. (1 point) <i>To earn this point, the response must relate the topic of the prompt to broader historical events, developments, or processes that occur before, during, or continue after the time frame of the question. This point is not awarded for merely a phrase or reference.</i>	To earn the point, the essay must accurately describe a context relevant to the role of the First World War in changing interactions between Europeans and colonized peoples. <i>Example:</i> • “Britain and France had long recruited local troops in their colonies and used them to fight their colonial wars or suppress anticolonial revolts .” (<i>Relates broader events and developments to the topic</i>)

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question (continued)

Points	Rubric	Notes
C: Evidence (0-3)	Evidence from the Documents: Uses the content of at least three documents to address the topic of the prompt. (1 point) OR Supports an argument in response to the prompt using at least six documents. (2 points)	<i>To earn one point, the response must accurately describe—rather than simply quote—the content from at least three of the documents to address the topic of the First World War and the relationships between Europeans and colonized peoples.</i> <i>Example:</i> • (Document 2) “Officer Kalyan Mukerji’s letter to a friend in India shows that the experience of the war has changed his views of England so that now he sees English-style nationalism as a bad thing.” (<i>describes the document accurately, and thus is credited as addressing the topic, but does not explicitly tie the description to an argument in response to the prompt</i>) OR <i>To earn two points, the response must accurately describe—rather than simply quote—the content from at least six documents. In addition, the response must use the content from the documents to support an argument in response to the prompt.</i> <i>Example:</i> • (Document 1): “John Chilembwe’s letter to the <i>Nyasaland Times</i> shows that Europeans’ need for African recruits has changed the relationship between colonizers and colonial peoples because the British in Nyasaland now have to appeal to Africans’ sense of duty and patriotism. But, after seeing how Europeans have treated their colonial subjects in peacetime, Africans aren’t buying it.” (<i>Connects the contents of the document to an argument about the ways in which the experience of the First World War changed the relationships between Europeans and colonized peoples.</i>)
	Evidence beyond the Documents: Uses at least one additional piece of specific historical evidence (beyond that found in the documents) relevant to an argument about the prompt. (1 point) <i>To earn this point, the evidence must be described, and must be more than a phrase or reference. This additional piece of evidence must be different from the evidence used to earn the point for contextualization.</i>	<i>Statements credited as evidence from outside the documents will typically be more specific details relevant to an argument, analogous to the function of evidence drawn from the documents.</i> <i>Typically, statements credited as contextualization will be more general statements that place an argument or a significant portion of it on a broader context.</i> <i>Example:</i> • “The peace treaties that ended the war left the British and French empires untouched and actually expanded them through the Mandate system.” (<i>provides a piece of evidence not in the documents relevant to an argument that addresses the prompt</i>)

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question (continued)

Points	Rubric	Notes
D: Analysis and Reasoning (0-2)	Sourcing: For at least three documents, explains how or why the document’s point of view, purpose, historical situation, and/or audience is relevant to an argument. (1 point) See document summaries for examples of possible sourcing	<i>To earn this point, the response must explain—rather than simply identify—how or why the document’s point of view, purpose, historical situation, or audience is relevant to an argument that addresses the prompt for each of the three documents sourced.</i> <i>Examples:</i> • (Document 3): “Part of the French government’s purpose in printing this postcard may have been to reassure the French population that African troops serving in France can be friendly and trustworthy. So even though the card shows Africans and French civilians sitting next to each other and smiling, it probably indicates that ordinary French people continued to be biased against Africans, even those fighting for their country.” (<i>provides sourcing regarding the purpose of the postcard relevant to an argument addressing the prompt</i>) • (Document 4): “Even though someone writing a private letter to his family can be expected to share their honest opinion of a situation, this was not always the case with soldiers’ letter during the war. The reason for that was that soldiers knew that government censors often read their letters and could decide not to deliver them if they thought they revealed something secret or could be bad for people’s morale. For example, Behari Lal’s letter says that what he is writing “is not a hundredth part” of what is on his mind, suggesting that his experiences were actually much worse than he reveals in the letter.” (<i>provides sourcing regarding the audience of the government report relevant to an argument addressing the prompt</i>)
	Complexity: Demonstrates a complex understanding of the historical development that is the focus of prompt, using evidence to corroborate, qualify, or modify an argument that addresses the question. (1 point) <i>This understanding must be part of the argument, not merely a phrase or reference.</i>	<i>Demonstrating a complex understanding might include:</i> • Considering the totality of the evidence and perspectives presented in the documents as demonstrated <u>by creating</u> a complex argument, while at the same time recognizing that some documents corroborate, <u>qualify</u> or <u>modify</u> the overall argument • Explaining the nuance of an issue by analyzing multiple factors or by considering diverse or alternative perspectives or evidence, <u>such as constructing an argument</u> that explains how the war both fostered and eroded colonial soldiers’ loyalty and patriotism for their colonial empires (as the early enthusiasm for the war gave way to disillusionment) or how wartime experiences sometimes challenged Europeans’ sense of cultural superiority over Africans and Asians and sometimes reinforced these prejudices. • Explaining relevant and insightful connections across time and space, such as <u>explaining how</u> the effects of the First World War on the relationship between colonial powers and colonial subjects compared to the effects of other military conflicts on colonial relationships (e.g. by comparing the experiences illustrated in the documents to the experiences of Latin American colonial subjects of Spain during the Napoleonic wars.)
If response is completely blank, enter - - for all four score categories A, B, C, and D		

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question (continued)

Document Summaries and Possible Sourcing

Document	Summary of Content	Explains the relevance of point of view, purpose, situation, and/or audience by elaborating on examples such as:
1. John Chilembwe, letter to <i>Nyasaland Times</i> (1914)	• Criticizes the duplicity of the British who, Chilembwe argues, have maintained that Africans cannot be equal to Europeans in peacetime but are now calling for Africans to share equally in the hardships and sacrifices of war. • There is stronger language regarding the existing exploitation of the colonies.	• Within months of the outbreak of the war, the British have already begun recruiting African troops (situation) • The author, an educated African (as evidenced by his being an ordained minister) is well aware of the narratives used to justify imperialism (for example the claim that “Africa had nothing to do with the civilized world” and turns these narratives around to point out the duplicity of British calls that Africans share equally in the hardships of war (POV) • Because the letter is addressed to British settlers and colonial authorities in Nyasaland it states its objection in a relatively mild and measured way. (audience).
2. Kalyan Mukerji, letter from the Iraq Front (1915)	• Denounces patriotism and nationalism, which the author blames for the bloodshed of the war. Argues that Indian youth have turned to political violence because they have been taught the politics of patriotism by Britain.	• The British used the colonial Indian army on multiple fronts, such as China (situation) • Because it is a private, front-line letter to a friend in India, the letter likely describes the author’s real feelings about the war (audience). Alternatively, an essay may argue that the author knew all mail was read by censors, so he used the letter to convey his protest to the authorities
3. French postcard of colonial troops in France (1915)	• The postcard shows three Black French colonial troops sitting in a bench in a French town with two French civilians. Both the soldiers and the civilians are smiling and appear comfortable together	• Whether the photo was candid or staged, the fact that it was selected by the French government to print as a postcard suggests that it presents an idealized version of colonial troops wartime experiences (purpose/POV) • The postcard is a response to German propaganda claiming that by deploying colonial troops on the Western Front, the French (and the British) were turning Europe over to “savages.” The postcard counters that by suggesting that the real savages were the Germans - a common claim of French propaganda during the war (situation)

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question (continued)

Document	Summary of Content	Explains the relevance of point of view, purpose, situation, and/or audience by elaborating on examples such as:
4. Behari Lal, letter from the Western Front (1917)	Narrates the author’s experience being transported together with British troops in a truck; the British troops would not sleep next to him because he was Indian. The author claims that a German prisoner would not have been any worse, and expresses regret that the war is exacerbating the “hatred” between Europeans and Indians.	- Written on the Western Front at a point in the war when it was clear that trench warfare with little or no gain would continue for a long time (situation) - The author’s cautious analysis of the reasons for the increased “hatred” and his mention that he has more on his mind than he is letting on indicate that he knows his letter will be read by the censors and is being extra careful in what he says or does not say (audience/purpose)
5. Egyptian protest song (1919)	Addressing the British in general and General Maxwell in particular, the song recalls the contribution of Egyptian “laborers” to the British wartime effort in the Dardanelles campaign. The song claims that Egyptians are resilient and are “sons of Pharaohs” and highlights the Egyptians’ determination to “gain a constitution.”	- Colonies’ dashed hopes of independence/autonomy in the aftermath of the war; resistance to colonial rule after the war (situation) - The song seeks to rally ordinary Egyptians behind the cause of resisting the British by referring to Egypt’s past glory under the Pharaohs and praising the Egyptian national character (audience)
6. Hubert Reid, petition to British colonial authorities in Jamaica (1935)	Claims that the “worthless lands” that Jamaican war veterans had received from the British colonial government after years of protests are worthless because of their poor location, lack of infrastructure, and lack of government financial support for veterans.	- Post-war veterans’ rights movements; unkept promises made by the colonial authorities to former troops (situation) - Since the purpose is to convince the Jamaica colonial authorities to expand veteran aid, the letter likely portrays veterans’ fortunes as worse than they actually were (purpose) - The author is not only a veteran himself, but also a leader of a veterans’ labor union, therefore he is likely to have a good grasp on the problems faced by Jamaican war veterans on the “macro” level - not just his own (POV)
7. Nar Diouf, interview recalling post-war experiences in West Africa (1982)	Recounts the author’s experiences in West Africa after he had served in the French Army during the war. The author argues his social standing was increased because of his wartime service and decorations. Other people in his village would ask him to represent them in their dealings with the French. The author narrates an episode in which he used the respect his service commanded to confront a French man being abusive to a blind African boy.	- Interview for an oral history project, many decades after the end of the war; the elapsed time may have affected the accuracy of the memories (situation) - The interviewee speaks from the point of view of someone important in his community and highlights the importance of his experience in the war in enhancing his social standing; he also speaks from the vantage point of the 1980s, so he sees his experiences under colonialism from the vantage point of post-colonial Africa (POV)

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question (continued)

Scoring Notes

Introductory notes:

- Except where otherwise noted, each point of these rubrics is earned independently, e.g., a student could earn a point for evidence without earning a point for thesis/claim.
- **Accuracy:** The components of this rubric require that students demonstrate historically defensible content knowledge. Given the timed nature of the exam, the essay may contain errors that do not detract from the overall quality, as long as the historical content used to advance the argument is accurate.
- **Clarity:** Exam essays should be considered first drafts and thus may contain grammatical errors. Those errors will not be counted against a student unless they obscure the successful demonstration of the content knowledge, skills, and practices described below.

Note: Student samples (when available) are quoted verbatim and may contain grammatical errors.

A. Thesis/Claim (0-1 points)

Responses earn one point by responding to the prompt with a historically defensible thesis that establishes a line of reasoning about the topic. To earn this point, the thesis must make a claim that responds to the prompt rather than simply restating or rephrasing the prompt. The thesis must suggest at least one main line of argument development or establish the analytic categories of the argument.

The thesis must consist of one or more sentences located in one place, either in the introduction or the conclusion.

The thesis must take a position on the extent to which the experience of the First World War changed relationships between Europeans and colonized peoples.

Examples of acceptable thesis: (hypothetical)

- “Although many people in the colonies at first responded patriotically to the call to arms, their experiences during the war led to disillusionment and questioning of the colonial order.” *(responds to the prompt with an evaluative claim that establishes a line of reasoning - claim foregrounds change)*
- “Despite the sacrifices of colonial troops, the war did not change the basic fact that Europeans continued to view colonized peoples as inferior and did not take any meaningful steps toward giving them greater rights or self-rule after 1918.” *(responds to the prompt with an evaluative claim that establishes a line of reasoning - claim foregrounds continuity)*
- “The experience of the First World War greatly changed the relationship between Europeans and colonized peoples because the war showed that Europeans needed colonial troops to fight their wars.” *(responds to the prompt with a minimally acceptable evaluative claim that establishes a line of reasoning)*

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question (continued)

Example of unacceptable thesis: (hypothetical)

- “World War I brought great changes to the relationships between Europeans and colonized peoples.” *(merely repeats the wording of the prompt with a minor qualification, which does not amount to indicating a line of reasoning)*
- “Since the Great War was mostly a European conflict, it had almost no influence on European colonies or colonial peoples.” *(not a historically defensible claim.)*
- “The First World War was a major turning point in the relationships between Europeans and colonized peoples in Africa and Asia.” *(offers a historically defensible claim but offers no indication as to the line of reasoning that the essay will take)*

B. Contextualization (0-1 points)

Responses earn a point for contextualization by describing a broader historical context relevant to the prompt. To earn this point, the response must accurately and explicitly connect the context of the prompt to broader historical events, developments, or processes that occur before, during, or continue after the time frame of the question. This point is not awarded for merely a phrase or reference.

To earn the point, the essay must accurately describe a context relevant to the role of the First World War in changing interactions between Europeans and colonized peoples.

Example of acceptable contextualization: (hypothetical)

- “Britain and France had long recruited local troops in their colonies and used them to fight their colonial wars or suppress anticolonial revolts.” *(Relates broader events and developments to the topic)*

Example of unacceptable contextualization: (hypothetical)

- “World War I was the first ‘total war.’” *(potentially relevant, but is merely a reference and does not meet the requirement of “describe.”)*
- “The Great War began as a relatively small conflict in the Balkans but quickly escalated. The systems of alliances, war strategies, and mobilization plans made it impossible to contain and stop the conflict before it had dragged all major European powers in.” *(potentially relevant, but has no clear link to colonized peoples and their wartime experiences)*

C. Evidence (0-3 points)

a) Document Content – Addressing the Topic (1 point)

In order to achieve the first point, the response must use the content of at least **three** documents to address the **topic** of the prompt (1 point). To earn one point for evidence from the documents, the response must accurately describe—rather than simply quote—the content from at least three of the documents to address the topic of the First World War and the relationships between Europeans and colonized peoples.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question (continued)

Example of describing the content of a document: (hypothetical)

- (Document 2) “Officer Kalyan Mukerji’s letter to a friend in India shows that the experience of the war has changed his views of England so that now he sees English-style nationalism as a bad thing.” *(describes the document accurately, and thus is credited as addressing the topic, but does not explicitly tie the description to an argument in response to the prompt)*

b) Document Content – Supporting an Argument (1 point)

In order to achieve the second point for evidence from the documents, the response needs to support an **argument** in response to the prompt by accurately using the content of at least **six** documents (2 points).

Example of supporting an argument using the content of a document: (hypothetical)

- (Document 1): “John Chilembwe’s letter to the *Nyasaland Times* shows that Europeans’ need for African recruits has changed the relationship between colonizers and colonial peoples because the British in Nyasaland now have to appeal to Africans’ sense of duty and patriotism. But, after seeing how Europeans have treated their colonial subjects in peacetime, Africans aren’t buying it.” *(connects the contents of the document to an argument about the ways in which the experience of the First World War changed the relationships between Europeans and colonized peoples.)*
- (Document 5): “The lyrics of the Egyptian protest song demonstrate how the experience of World War I has given Egyptians greater confidence to assert their demands before their British colonial government. The song reminds the British of the contributions Egyptians made during the war and forcefully demands that Britain grant Egypt its own constitution.” *(connects the contents of the document to an argument about the ways in which the experience of the First World War changed the relationships between Europeans and colonized peoples.)*

c) Evidence beyond the Documents (1 point)

The response must use at least one additional piece of specific historical evidence (beyond that found in the documents) relevant to an argument that addresses the role of the First World War in changing the relationships between Europeans and colonized peoples (1 point). To earn this point, the evidence must be described, and must be more than a phrase or reference. This additional piece of evidence must be different from the evidence used to earn the point for contextualization.

Typically, statements credited as **contextualization** will be more general statements that place an argument or a significant portion of it in a broader context. Statements credited as **evidence from outside the documents** will typically be more specific details relevant to an argument, analogous to the function of evidence drawn from the documents.

Example of providing an example or additional piece of specific evidence beyond the documents relevant to an argument that addresses the prompt:

- “The peace treaties that ended the war left the British and French empires untouched and actually expanded them through the Mandate system.” *(provides a piece of evidence not in the documents relevant to an argument that addresses the prompt)*
- “Before WWI broke out, the British had used Indian troops in many campaigns, for example in China during the Boxer rebellion.” *(provides a piece of evidence not in the documents relevant to an argument that addresses the prompt)*

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question (continued)

D. Analysis and Reasoning (2 points)

Document Sourcing (0-1 points)

For at least **three** documents, the response explains how or why the document's point of view, purpose, historical situation, and/or audience is relevant to an argument that addresses the prompt (1 point). To earn this point, the response must explain how or why—rather than simply identifying—the document's point of view, purpose, historical situation, or audience is relevant to an argument addressing the prompt for each of the three documents sourced.

Example of acceptable explanation of the significance of the author's point of view:

- (Document 1): "As an ordained minister, John Chilembwe is probably opposed to wars in general, but in the case of the First World War he is particularly against the idea of Africans serving because he can see that there is no higher purpose to the war than European political and economic gain." *(provides sourcing regarding the POV of the author relevant to an argument addressing the prompt)*

Example of acceptable explanation of the significance of the author's purpose:

- (Document 3): "Part of the French government's purpose in printing this postcard may have been to reassure the French population that African troops serving in France can be friendly and trustworthy. So even though the card shows Africans and French civilians sitting next to each other and smiling, it probably indicates that ordinary French people continued to be biased against Africans, even those fighting for their country." *(provides sourcing regarding the purpose of the postcard relevant to an argument addressing the prompt)*

Examples of acceptable explanation of the relevance of the historical situation of a document:

- (Document 7): "Nar Diouf's experiences in the war are recorded in the 1980s as part of an oral history project. So he has the benefit of hindsight regarding both the end of the war and the end of French colonialism in Africa. From this perspective, it is understandable that Nar Diouf emphasizes the way in which being a veteran allowed him to be effective in helping his community resist the abuses of French colonizers." *(provides sourcing regarding the historical situation of the document relevant to an argument addressing the prompt)*

Examples of acceptable explanation of the significance of the audience:

- (Document 4): "Even though someone writing a private letter to his family can be expected to share their honest opinion of a situation, this was not always the case with soldiers' letter during the war. The reason for that was that soldiers knew that government censors often read their letters and could decide not to deliver them if they thought they revealed something secret or could be bad for people's morale. For example, Behari Lal's letter says that what he is writing "is not a hundredth part" of what is on his mind, suggesting that his experiences were actually much worse than he reveals in the letter." *(provides sourcing regarding the audience of the government report relevant to an argument addressing the prompt)*

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 1 — Document-Based Question (continued)

Demonstrating Complex Understanding (0-1 points)

The response demonstrates a complex understanding how the experience of the First World War changed relationships between Europeans and colonized peoples, using evidence to corroborate, qualify, or modify an argument that addresses the question.

Demonstrating a complex understanding might include:

- Considering the totality of the evidence and perspectives presented in the documents as demonstrated by creating a complex argument, while at the same time recognizing that some documents corroborate, qualify or modify the overall argument
- Explaining the nuance of an issue by analyzing multiple factors or by considering diverse or alternative perspectives or evidence, such as constructing an argument that explains how the war both fostered and eroded colonial soldiers' loyalty and patriotism for their colonial empires (as the early enthusiasm for the war gave way to disillusionment) or how wartime experiences sometimes challenged Europeans' sense of cultural superiority over Africans and Asians and sometimes reinforced these prejudices.
- Explaining relevant and insightful connections across time and space, such as explaining how the effects of the First World War on the relationship between colonial powers and colonial subjects compared to the effects of other military conflicts on colonial relationships (e.g. by comparing the experiences illustrated in the documents to the experiences of Latin American colonial subjects of Spain during the Napoleonic wars.)

This understanding must be part of the argument, not merely a phrase or reference.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 2 — Long-Essay Question

“Different social, technological, and environmental factors led to the development of complex civilizations in the period before 600 B.C.E.

Develop an argument that evaluates how one or more factors led to the development of complex civilizations in this time period.”

Maximum Possible Points: 6

Points	Rubric	Notes
A: Thesis/Claim (0–1)	Thesis/Claim: Responds to the prompt with a historically defensible thesis/claim that establishes a line of reasoning. (1 point) <i>To earn this point, the thesis must make a claim that responds to the prompt, rather than merely restating or rephrasing the prompt. The thesis must consist of one or more sentences located in one place, either in the introduction or the conclusion.</i>	The thesis statement must make a historically defensible claim about the way in which social, technological, or environmental factors led to the development of complex civilizations in the period before 600 B.C.E., with some indication of the reasoning for making that claim. <i>Note: the thesis does <u>not</u> need to refer to a specific complex civilization.</i> <i>The thesis is <u>not</u> required to encompass the entire period, but must identify a relevant development or developments in the period.</i> <i>Examples:</i> • “The development of irrigation was a major factor leading to complex civilizations in the period before 600 B.C.E.” (responds to the prompt with a minimally acceptable claim that establishes a line of reasoning) • “The development of weapons made of metal allowed professional soldiers, aristocratic elites, and kings to dominate larger and larger states, eventually establishing the first empires like those of the Assyrians and Chaldeans.” (responds to the prompt with an evaluative claim that establishes a line of reasoning)

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 2 — Long-Essay Question (continued)

Points	Rubric	Notes
B: Contextualization (0–1)	Contextualization: Describes a broader historical context relevant to the prompt. (1 point) <i>To earn this point, the response must relate the topic of the prompt to broader historical events, developments, or processes that occur before, during, or continue after the time frame of the question. This point is not awarded for merely a phrase or a reference.</i>	To earn this point, the essay must accurately describe a context relevant to social, technological, or environmental factors leading to the development of complex civilizations in the period before 600 B.C.E. <i>Example:</i> Studies have shown that some Neolithic societies were able to produce more food than they needed to feed themselves, which allowed them to develop labor specialization (<i>relates broader events and developments to the topic</i>) <i>Because this question covers the first period of the course, readers should carefully distinguish between information provided for contextualization versus information provided as evidence.</i>

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 2 — Long-Essay Question (continued)

Points	Rubric	Notes
C: Evidence (0–2)	Evidence: Provides specific examples of evidence relevant to the topic of the prompt. (1 point) OR Supports an Argument: Supports an argument in response to the prompt using specific and relevant examples of evidence. (2 points)	<i>To earn the first point, the response must <u>identify at least two specific historical examples</u> relevant to the development of complex civilizations before 600 B.C.E.</i> <i>Note: General assertions containing no specific information beyond what is provided in the introductory statement should not be credited as “specific historical examples.”</i> <i>Example (unacceptable):</i> • “Technological changes were instrumental in the rise of complex civilizations before 600 B.C.E.” (does not count toward earning the point because there is no specific information beyond what is provided in the introductory statement). <i>Example (acceptable):</i> • “The invention of bronze metallurgy led to greater productivity and more efficient weapons” (counts toward earning the point because there is a specific historical example relevant to the prompt). OR <i>To earn the second point, the response must <u>use at least two specific historical examples to support an argument</u> in response to the prompt.</i> <i>If a response has a multi-part argument (e.g. the rise of agriculture led to complex communities; and complex communities led to states and civilizations), then the response can earn the second evidence point by using only one specific historical example for <u>each</u> part of the multi-part argument (but the total number of examples used must still be at least two).</i> <i>Evidence used to support an argument might include:</i> • The domestication of plant species or animal species, such as wheat and other grains, fruits and vegetables, cattle, dogs, pigs, horses, etc., with variation based on local environments • The development of a wide variety of tools and technologies, such as stone tools, bronze tools, iron tools, weapons, wheels, chariots, and pottery • The development of writing systems, such as cuneiform, hieroglyphs, along with bureaucratic organization, record keeping, and law codes • The evolution of complex social organization prior to 600 B.C.E., such as professional specializations like priests, warriors, or artisans, patriarchy, or sedentary villages

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 2 — Long-Essay Question (continued)

Scoring Notes

Introductory notes:

- Except where otherwise noted, each point of these rubrics is earned independently; for example, a student could earn a point for evidence without earning a point for thesis/claim.
- **Accuracy:** The components of these rubrics require that students demonstrate historically defensible content knowledge. Given the timed nature of the exam, essays may contain errors that do not detract from their overall quality, as long as the historical content used to advance the argument is accurate.
- **Clarity:** Exam essays should be considered first drafts and thus may contain grammatical errors. Those errors will not be counted against a student unless they obscure the successful demonstration of the content knowledge, skills, and practices described below.

Note: Student samples are quoted verbatim and may contain grammatical errors.

A. Thesis/Claim (0–1 points)

Responses earn **one** point by responding to the prompt with a historically defensible thesis or claim about how factors in the ancient world before 600 B.C.E. led to the development of complex civilizations. To earn this point, the thesis must make a claim that responds to the prompt rather than simply restating or rephrasing the prompt. The thesis must consist of one or more sentences located in one place, either in the introduction or the conclusion.

Examples of an acceptable thesis (hypothetical)

- “Perhaps the most important long-term cause for the emergence of complex civilization was the Neolithic Revolution. Only with the development of agriculture did human population increase, communities grew, and eventually complex societies and states like Mesopotamia and Egypt emerged.” (*responds to the prompt with an evaluative claim that establishes a line of reasoning*)
- “The development of irrigation was a major factor leading to complex civilizations in the period before 600 B.C.E.” (*responds to the prompt with a minimally acceptable claim that establishes a line of reasoning*)
- “The development of weapons made of metal allowed professional soldiers, aristocratic elites, and kings to dominate larger and larger states, eventually establishing the first empires like those of the Assyrians and Chaldeans.” (*responds to the prompt with an evaluative claim that establishes a line of reasoning*)

Examples of an unacceptable thesis (hypothetical)

- In the period before 600 B.C.E., complex civilizations emerged as a result of an interplay between many social, technological, and environmental factors. (*offers a historically defensible claim, but includes no additional information beyond what is provided in the introductory statement and no indication of a line of reasoning.*)
- “The first civilizations were herders or pastoralists who came out of the steppes and conquered everything, establishing big states and empires.” (*not a historically defensible claim.*)
- Complex civilizations before 600 B.C.E., generally had rulers, priests, soldiers and cultivators, with the last group accounting for the great majority of the population.” (*potentially relevant to the prompt, but does not reference a specific cause*)

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 2 — Long-Essay Question (continued)

B. Contextualization (0–1 points)

Responses earn **one** point by describing a broader historical context relevant to the prompt. To earn this point, the response must relate the topic of the prompt to broader historical events, developments, or processes that occurred before, during, or continued after the time frame before 600 B.C.E. This point is not awarded for merely a phrase or a reference.

To earn the point, the essay must accurately describe a context relevant to social, technological, or environmental factors leading to the development of complex civilizations in the period before 600 B.C.E.

Example of acceptable contextualization (hypothetical):

- “Studies have shown that some Neolithic societies were able to produce more food than they needed to feed themselves, which allowed them to develop labor specialization.” (*relates broader events and developments to the topic*)

Examples of unacceptable contextualization (hypothetical):

- “The Fertile Crescent was an early center of domestication.” (*potentially relevant, but is merely a reference and does not meet the requirement of “describe”*)
- “When the first modern *Homo sapiens* got to Europe, they encountered the Neanderthals, a more primitive group with less sophisticated tools.” (*has no clear link to the emergence of complex societies*)

C. Evidence (0–2 points)

Evidence

Responses earn **one** point by providing at least two specific examples of evidence relevant to the **topic** of the prompt. Responses can earn this point without earning the point for a thesis statement. To earn this point, the response must identify specific historical examples of evidence relevant to the topic of the development of complex civilizations before 600 B.C.E. These examples of evidence must be different from the information used to earn the point for contextualization.

Typically, statements credited as **contextualization** will be more general statements that place an argument or a significant portion of it in a broader context. Statements credited as **evidence** will typically be more specific information.

General assertions containing no specific information beyond what is provided in the introductory statement should not be credited as “specific historical examples.”

Example of a statement that counts toward earning one point for evidence (hypothetical):

“The invention of bronze metallurgy led to greater productivity and more efficient weapons.” (*counts toward earning the point because there is a specific historical example relevant to the prompt*)

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 2 — Long-Essay Question (continued)

Example of a statement that does not count toward earning one point for evidence (hypothetical):

“Technological changes were instrumental in the rise of complex civilizations before 600 B.C.E.” (*does not count toward earning the point because there is no specific information beyond what is provided in the introductory statement*)

OR

Supports an Argument

Responses earn **two** points if they support an **argument** in response to the prompt using specific and relevant examples of evidence. To earn the second point, the response must use specific historical evidence to support an argument regarding how social, technological, or environmental factors led to the development of complex civilizations in the period before 600 B.C.E.

Example of successfully supporting an argument with evidence

- “The development of new technologies, including the wheel, pottery, the plow, and metallurgy allowed human communities to increase in size, complexity, wealth and power. As communities competed, traded, and expanded through a period of warring states, eventually large civilizations and empires developed.” (*uses multiple, specific pieces of evidence in accurate support of an argument that addresses the prompt*)

D. Analysis and Reasoning (0–2 points)

Historical Reasoning

Responses earn **one** point by using a historical-reasoning skill to frame or structure an argument about how social, technological, or environmental factors led to the development of complex civilizations in the period before 600 B.C.E.. To earn this point, the response must demonstrate the use of historical reasoning to frame or structure an argument, although the reasoning might be uneven, imbalanced, or inconsistent.

Examples of using historical reasoning might include:

- Explaining how new technologies in the period before 600 B.C.E. led to the emergence and spread of complex civilizations
- Explaining how social stratification in the period before 600 B.C.E. led to the emergence and spread of complex civilizations
- Explaining how environmental processes or changes in the period before 600 B.C.E. led to the emergence and spread of complex civilizations

OR

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 2 — Long-Essay Question (continued)

Complexity

Responses earn **two** points by demonstrating a complex understanding of how social, technological, or environmental factors led to the development of complex civilizations in the period before 600 B.C.E. by using evidence to corroborate, qualify, or modify an argument that addresses the question.

Demonstrating complex understanding might include:

- Explaining the nuance of an issue by analyzing multiple factors or by considering diverse or alternative perspectives or evidence, such as constructing an argument that compares the role of several different types of factors in the emergence of complex civilizations.
- Qualifying or modifying the main argument of the essay to demonstrate awareness of historical complexity, such as constructing an argument that explains how social, technological, or environmental factors may, in some cases, lead to the emergence of complex civilizations, and, in other cases, to civilizational decline and collapse. (for example, the role of weapons associated with nomadic pastoralists, such as chariots and composite bows, first disrupting agrarian civilizations and later strengthening them.)
- Explaining relevant and insightful connections across time and space, such as explaining how the agricultural-technological complex in Afro-Eurasia and America was different from the one in the Americas leading to the development of complex civilizations in the two hemispheres.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 3 — Long-Essay Question

“In the period 1450-1750, oceanic voyages resulted in the Columbian Exchange, which transformed the Eastern and Western Hemispheres.

Develop an argument that evaluates how the Columbian Exchange affected peoples in Afro-Eurasia in this time period.”

Maximum Possible Points: 6

Points	Rubric	Notes
A: Thesis/Claim (0-1)	Thesis/Claim: Responds to the prompt with a historically defensible thesis/claim that establishes a line of reasoning. (1 point) <i>To earn this point, the thesis must make a claim that responds to the prompt, rather than merely restating or rephrasing the prompt. The thesis must consist of one or more sentences located in one place, either in the introduction or the conclusion.</i>	The thesis statement must make a historically defensible claim about how the Columbian Exchange affected peoples in <u>Afro-Eurasia</u> in the period 1450-1750, with some indication of the reasoning for making that claim. <i>The thesis does <u>not</u> need to encompass the entire period, but must identify a relevant development or developments in the period.</i> <i>Examples:</i> • “European peoples were better able to take advantage of the Columbian Exchange between 1450 and 1750 than African or Asian societies. European societies not only gained new crops, but they also were able to take control of new lands and resources for the benefit of their populations, their economies, and their political power.” <i>(responds to the prompt with an evaluative claim that establishes a line of reasoning)</i> • “The spread of American staple crops to Africa and Eurasia benefitted those societies by improving their diet.” <i>(responds to the prompt with a minimally acceptable claim that establishes a line of reasoning)</i>
B: Contextualization (0-1)	Contextualization: Describes a broader historical context relevant to the prompt. (1 point) <i>To earn this point, the response must relate the topic of the prompt to broader historical events, developments, or processes that occur before, during, or continue after the time frame of the question. This point is not awarded for merely a phrase or a reference.</i>	To earn this point, the essay must accurately describe a context relevant to the effects of the Columbian Exchange on the peoples of Afro-Eurasia in the period 1450-1750. <i>Example:</i> • “The Columbian Exchange resulted from the expansion of European colonialism, especially by the Spanish and Portuguese, in both the Americas and Asia.” <i>(relates broader events and developments to the topic)</i>

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 3 — Long-Essay Question (continued)

Points	Rubric	Notes
C: Evidence (0–2)	Evidence: Provides specific examples of evidence relevant to the topic of the prompt. (1 point) OR Supports an Argument: Supports an argument in response to the prompt using specific and relevant examples of evidence. (2 points)	To earn the first point, the response <u>must identify at least two specific historical examples</u> relevant to the effects of the Columbian Exchange in Afro-Eurasia in the period 1450-1750. <i>Note: General assertions containing no specific information beyond what is provided in the introductory statement should not be credited as “specific historical examples.”</i> <i>Example (acceptable):</i> • “Maize cultivation spread from the Americas to Afro-Eurasia.” (<i>counts toward earning the point because there is a specific historical example relevant to the prompt</i>) <i>Example (unacceptable):</i> • “The Columbian Exchange was a direct outcome of the European oceanic voyages.” (<i>does not count toward earning the point because there is no specific information beyond what is provided in the introductory statement</i>) OR To earn the second point, the response must <u>use at least two specific historical examples to support an argument</u> in response to the prompt. If a response has a multi-part argument (<i>e.g. crops spread to Eurasia, and diseases in the Americas helped European expansion</i>), then the response can earn the second evidence point by using only one specific historical example for <u>each</u> part of the multi-part argument (but the total number of examples used must still be at least two). <i>Evidence used to support an argument might include:</i> • The spread of new American crops, like potatoes and maize, improved the nutrition of peoples in Afro-Eurasia. • The colonization of the Americas by European populations, along with the devastating effects of the Columbian Exchange on Amerindian populations, benefitted European populations by expanding the resources available to be removed from the Americas and used by European peoples and economies. • The spread of plantation crops from Europe to the Americas and the development of massive plantation economies in the Americas transformed the world economy with complex effects on European and African societies. These effects included the mass enslavement of many African communities and the enrichment of European planter classes.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 3 — Long-Essay Question (continued)

Scoring Notes

Introductory notes:

- Except where otherwise noted, each point of these rubrics is earned independently; for example, a student could earn a point for evidence without earning a point for thesis/claim.
- **Accuracy:** The components of these rubrics require that students demonstrate historically defensible content knowledge. Given the timed nature of the exam, essays may contain errors that do not detract from their overall quality, as long as the historical content used to advance the argument is accurate.
- **Clarity:** Exam essays should be considered first drafts and thus may contain grammatical errors. Those errors will not be counted against a student unless they obscure the successful demonstration of the content knowledge, skills, and practices described below.

Note: Student samples are quoted verbatim and may contain grammatical errors.

A. Thesis/Claim (0–1 points)

Responses earn one point by responding to the prompt with a historically defensible thesis that establishes a line of reasoning about the topic. To earn this point, the thesis must make a claim that responds to the prompt rather than simply restating or rephrasing the prompt. The thesis must suggest at least one main line of argument development or establish the analytic categories of the argument.

The thesis must consist of one or more sentences located in one place, either in the introduction or the conclusion.

The thesis must take a position on how the Columbian Exchange affected peoples in Afro-Eurasia in the period 1450–1750.

The thesis is not required to encompass the entire period, but must identify a relevant development or developments in the period.

Examples of an acceptable thesis (hypothetical)

- “European peoples were better able to take advantage of the Columbian Exchange between 1450 and 1750 than African or Asian societies. European societies not only gained new crops, but they also were able to take control of new lands and resources for the benefit of their populations, their economies, and their political power.” (*responds to the prompt with an evaluative claim that establishes a line of reasoning*)
- “The Columbian Exchange is part of a complex set of early modern historical circumstances, including the slave trade, the rise of Atlantic plantations and cash crop exports, and the colonization of the Americas, all of which benefitted Europeans and harmed Africans and Amerindians.” (*responds to the prompt with an evaluative claim that establishes a line of reasoning*)
- “The spread of American staple crops to Africa and Eurasia benefitted those societies by improving their diet.” (*responds to the prompt with a minimally acceptable claim that establishes a line of reasoning*)

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 3 — Long-Essay Question (continued)

Examples of an unacceptable thesis (hypothetical)

- “After 1450, the Columbian Exchange completely transformed the lives of peoples in Afro-Eurasia, and in the entire Eastern hemisphere.” (offers a historically defensible claim, but includes no additional information beyond what is provided in the introductory statement and no indication of a line of reasoning)
- “The Columbian Exchange brought new animals like horses and camels to Africa, which helped more prosperous African empires to expand and colonize new regions.” (*not a historically defensible claim*)
- “The Columbian Exchange between 1450 and 1750 spread diseases that destroyed almost all of the indigenous societies of the Americas.” (*does not respond directly to the prompt because there is no clear link to effects of the Columbian Exchange in Afro-Eurasia*)

B. Contextualization (0–1 points)

Responses earn **one** point by describing a broader historical context relevant to the prompt. To earn this point, the response must relate the topic of the prompt to broader historical events, developments, or processes that occurred before, during, or continued after the time frame of 1450 to 1750. This point is not awarded for merely a phrase or a reference.

To earn the point, the essay must accurately describe a context relevant to how the Columbian Exchange affected peoples in Afro-Eurasia between 1450 and 1750.

Example of acceptable contextualization (hypothetical):

- “The Columbian Exchange resulted from the expansion of European colonialism, especially by the Spanish and Portuguese, in both the Americas and Asia.” (*relates broader events and developments to the topic*)

Examples of unacceptable contextualization (hypothetical):

- “Smallpox, influenza, and plague were ‘Old World’ diseases.” (*potentially relevant, but is merely a reference and does not meet the requirement of “describe”*)
- “The Inca in South America, and the Aztecs in Mesoamerica had built the two largest Native American empires by 1450.” (*potentially relevant, but has no clear link to the Columbian Exchange or its effects on Afro-Eurasia*)

C. Evidence (0–2 points)

Evidence

Responses earn **one** point by providing at least two specific examples of evidence relevant to the **topic** of the prompt. Responses can earn this point without earning the point for a thesis statement. To earn this point, the response must identify specific historical examples of evidence relevant to the topic of how the Columbian Exchange affected peoples in Afro-Eurasia in the period from 1450 to 1750. These examples of evidence must be different from the information used to earn the point for contextualization.

Typically, statements credited as **contextualization** will be more general statements that place an argument or a significant portion of it in a broader context. Statements credited as **evidence** will typically be more specific information.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 3 — Long-Essay Question (continued)

General assertions containing no specific information beyond what is provided in the introductory statement should not be credited as “specific historical examples.”

Example of a statement that counts toward earning one point for evidence (hypothetical):

- “Maize cultivation spread from the Americas to Afro-Eurasia.” (*counts toward earning the point because there is a specific historical example relevant to the prompt*)

Example of a statement that does not count toward earning one point for evidence (hypothetical):

- “The Columbian Exchange was a direct outcome of the European oceanic voyages.” (*does not count toward earning the point because there is no specific information beyond what is provided in the introductory statement*)

OR

Supports an Argument

Responses earn **two** points if they support an **argument** in response to the prompt using specific and relevant examples of evidence. To earn the second point, the response must use specific historical evidence to support an argument regarding how the Columbian Exchange affected peoples in Afro-Eurasia in the period from 1450 to 1750.

Example of successfully supporting an argument with evidence

- “The Columbian Exchange brought staple crops from the Americas to Eurasia, which contributed directly to improved nutrition and population growth, especially in Europe and Asia. During the period from 1450 to 1750 the growth and stability of economies and even empires in Spain, England, and even China can be connected to the bounty of the Columbian Exchange for Eurasia.” (*uses multiple, specific pieces of evidence in accurate support of an argument that addresses the prompt*)

D. Analysis and Reasoning (0–2 points)

Historical Reasoning

Responses earn **one** point by using a historical-reasoning skill to frame or structure an argument about how the Columbian Exchange affected peoples in Afro-Eurasia during the period 1450–1750. To earn this point, the response must demonstrate the use of historical reasoning to frame or structure an argument, although the reasoning might be uneven, imbalanced, or inconsistent.

Examples of using historical reasoning might include:

- Explaining or comparing the nutritional benefits of the spread of American crops to Africa, Europe, and Asia.
- Explaining how the population transfers following the European exploration and settlement of the Americas led to the technological, agricultural, and biological transfers of the Columbian Exchange.
- Explaining the differential impacts of the processes of the Columbian Exchange on Amerindian, European-American, and African-American populations in the Americas.

OR

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 3 — Long-Essay Question (continued)

Complexity

Responses earn **two** points by demonstrating a complex understanding of how the Columbian Exchange affected peoples in Afro-Eurasia in the period 1450-1750 by using evidence to corroborate, qualify, or modify an argument that addresses the question.

Demonstrating a complex understanding might include:

- Explaining the nuance of an issue by analyzing multiple factors or by considering diverse or alternative perspectives or evidence, such as constructing an argument that complex process such as the Columbian exchange could have different, sometimes disparate, effects on peoples in the Afro-Eurasia. (for example, explaining the complex effects of the spread of crops like manioc or cassava to Africa along with the devastating consequences of the slave trade that accompanied the new staple foods)
- Qualifying or modifying the main argument of the essay to demonstrate awareness of historical complexity, such as constructing an argument that explains how the processes of the Columbian Exchange had both intended and unintended effects (for example, the deliberate introduction of Afro-Eurasian crops and domesticated animals versus the unintended transfer of pathogens, disease vectors, and invasive species)
- Explaining relevant and insightful connections across time and space , such as explaining how some of the effects of the Columbian Exchange, (the demographic effects from the transfer of pathogens) happened relatively quickly, while other effects, (the demographic and ecological effects from the adoption of new crops), happened over many decades or centuries. Or explaining significant regional variations in the effect of the Columbian exchange on peoples in the Europe, Africa and Asia.

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 4 — Long-Essay Question

“In the period 1900 to 2001, rapid advances in science and technology took place.

Develop an argument that evaluates how advances in science and technology affected society in this time period.”

Maximum Possible Points: 6

Points	Rubric	Notes
A: Thesis/Claim (0–1)	Thesis/Claim: Responds to the prompt with a historically defensible thesis/claim that establishes a line of reasoning. (1 point) <i>To earn this point, the thesis must make a claim that responds to the prompt, rather than merely restating or rephrasing the prompt. The thesis must consist of one or more sentences located in one place, either in the introduction or the conclusion.</i>	The thesis statement must make a historically defensible claim about how advances in science and technology affected society in the period 1900 to 2001, with some indication of the reasoning for making that claim. <i>Note: the wording of the prompt should <u>not</u> be construed as requiring students to discuss “science” and “technology” as two separate categories. Student responses may address only scientific advances, or only technological advances, or both scientific and technological advances.</i> <i>Note: the thesis does not need to mention a specific technology to be creditable. It must mention an effect on society.</i> <i>The thesis does <u>not</u> need to encompass the entire period, but must identify a relevant development or developments in the period. Thesis attempts referring to specific post-2001 technologies <u>might</u> be acceptable if the broader thesis statement is correct for the pre-2001 period.</i> <i>Examples:</i> • “The development of nuclear technology during the twentieth century boosted economic development but also created new risks. Nuclear energy is usually cheap and clean, but it can lead to nuclear waste and accidents like Chernobyl and Fukushima. And while the threat of nuclear destruction can sometimes prevent major wars, nuclear proliferation is a real problem.” (<i>responds to the prompt with an evaluative claim that establishes a line of reasoning</i>) • “In the twentieth century, medical advances led to people living longer and having better quality of life.” (<i>responds to the prompt with a minimally acceptable claim that establishes a line of reasoning</i>)
B: Contextualization (0–1)	Contextualization: Describes a broader historical context relevant to the prompt. (1 point) <i>To earn this point, the response must relate the topic of the prompt to broader historical events, developments, or processes that occur before, during, or continue after the time frame of the question. This point is not awarded for merely a phrase or a reference.</i>	To earn this point, the essay must accurately describe a context relevant to the ways in which advances in science and technology affected society in the twentieth century. <i>Example:</i> • “The Second Industrial Revolution resulted in a much wider array of consumer goods, at prices that more and more people could afford” (<i>relates broader events and developments to the topic</i>)

Question 4 — Long-Essay Question (continued)

Points	Rubric	Notes
C: Evidence (0–2)	Evidence: Provides specific examples of evidence relevant to the topic of the prompt. (1 point) OR Supports an Argument: Supports an argument in response to the prompt using specific and relevant examples of evidence. (2 points)	<i>To earn the first point, the response must identify at least two specific historical examples relevant to the effects of advances in science and technology in the period 1900–2001.</i> <i>Note: General assertions containing no specific information beyond what is provided in the introductory statement should not be credited as “specific historical examples.”</i> <i>Example (acceptable):</i> • “The development of new crops through the Green Revolution greatly decreased starvation during the late twentieth century.” (counts toward earning the point because there is a specific historical example relevant to the prompt) <i>Example (unacceptable):</i> • “During the late twentieth century a whole host of new technologies transformed social structures.” (does not count toward earning the point because there is no specific information beyond what is provided in the introductory statement) OR <i>To earn the second point, the response must use at least two specific historical examples to support an argument in response to the prompt.</i> <i>If a response has a multi-part argument (e.g. some technologies, like the Green Revolution, helped developing countries; and other technologies like the internet, helped developed economies more), then the response can earn the second evidence point by using only one specific historical example for <u>each</u> part of the multi-part argument (but the total number of examples used must still be at least two).</i> <i>Evidence used to support an argument might include:</i> • New modes of communication like radio, television, and internet brought people into closer contact. • New medical innovations, like vaccines and antibiotics, increased human life expectancy and increased populations. • New forms of technology, like birth control and broadcast media, changed culture such as youth culture, reproductive relationships, and globalization of culture.

Question 4 — Long-Essay Question (continued)

Points	Rubric	Notes
D: Analysis and Reasoning (0–2)	Historical Reasoning: Uses historical reasoning (e.g., comparison, causation, continuity and change over time) to frame or structure an argument that addresses the prompt. (1 point) <i>To earn the first point, the response must demonstrate the use of historical reasoning to frame or structure an argument about how advances in science and technology affected society in the period 1900–2001.</i> OR Complexity: Demonstrates a complex understanding of the historical development that is the focus of prompt, using evidence to corroborate, qualify, or modify an argument that addresses the prompt. (2 points) <i>To earn the second point, the response must demonstrate a complex understanding of how advances in science and technology affected society in the period 1900–2001.</i>	<i>Essays must use historical reasoning to explain how advances in science and technology affected society in the period 1900 to 2001.</i> <i>Examples of using historical reasoning might include:</i> • Explaining how medical and agricultural innovations led to longer human lives and increased populations • Explaining the negative environmental effects of increasing industrial productivity or easier/faster travel and communications • Explaining the effects of scientific and technological change on social norms and categories (for example, changing gender and family norms, changing views of gender and gender roles) • Explaining the effects of scientific and technological change on culture and/or belief systems (e.g. globalization) OR <i>Demonstrating complex understanding might include:</i> • Explaining the nuance of an issue by analyzing multiple factors or by considering diverse or alternative perspectives or evidence, such as <u>constructing an argument</u> that scientific and technological advances have, on the one hand, helped bridge old economic, social and cultural divides while, on the other hand, opening new divides and creating new antagonisms and inequalities. • Qualifying or modifying the main argument of the essay to demonstrate awareness of historical complexity, such as <u>constructing an argument</u> that explains how, despite its immense social benefits, the Green Revolution has brought some unintended negative consequences, such as overreliance on genetically modified seeds, greater pesticide use, and increased pressure on ecosystems around the world. • Explaining relevant and insightful connections across time and space, such as <u>explaining how</u> the effects of 20th century medical innovations were very different in developing versus developed societies. In developed societies, lifestyle illnesses like diabetes and heart disease are predominate; while in developing countries infectious diseases are still quite prevalent. <i>This demonstration of complex understanding must be part of the argument, not merely a phrase or reference.</i>
If response is completely blank, enter - - for all four score categories: A, B, C, and D

Question 4 — Long-Essay Question (continued)

Scoring Notes

Introductory notes:

- Except where otherwise noted, each point of these rubrics is earned independently; for example, a student could earn a point for evidence without earning a point for thesis/claim.
- **Accuracy:** The components of these rubrics require that students demonstrate historically defensible content knowledge. Given the timed nature of the exam, essays may contain errors that do not detract from their overall quality, as long as the historical content used to advance the argument is accurate.
- **Clarity:** Exam essays should be considered first drafts and thus may contain grammatical errors. Those errors will not be counted against a student unless they obscure the successful demonstration of the content knowledge, skills, and practices described below.

Note: Student samples are quoted verbatim and may contain grammatical errors.

A. Thesis/Claim (0–1 points)

Responses earn one point by responding to the prompt with a historically defensible thesis that establishes a line of reasoning about the topic. To earn this point, the thesis must make a claim that responds to the prompt rather than simply restating or rephrasing the prompt. The thesis must suggest at least one main line of argument development or establish the analytic categories of the argument.

The thesis must consist of one or more sentences located in one place, either in the introduction or the conclusion.

The thesis must take a position on how advances in science and technology affected society in the period 1900 to 2001.

Note: the wording of the prompt should not be construed as requiring students to discuss “science” and “technology” as two separate categories. Student responses may address only scientific advances, or only technological advances, or both scientific and technological advances.

Note: the thesis does not need to mention a specific technology to be creditable. It must mention an effect on society.

The thesis is not required to encompass the entire period, but must identify a relevant development or developments in the period. Thesis attempts referring to specific post-2001 technologies might be acceptable if the broader thesis statement is correct for the pre-2001 period.

Examples of an acceptable thesis (hypothetical)

- “The development of nuclear technology during the twentieth century boosted economic development but also created new risks. Nuclear energy is usually cheap and clean, but it can lead to nuclear waste and accidents like Chernobyl and Fukushima. And while the threat of nuclear destruction can sometimes prevent major wars, nuclear proliferation is a real problem.” (*responds to the prompt with an evaluative claim that establishes a line of reasoning*)
- “New military technologies between 1900 and 2001, especially machine guns, explosives, and nuclear weapons, led to much more violence, civilian casualties, and environmental destruction.” (*responds to the prompt with a historically defensible claim that establishes a line of reasoning*)
- “In the twentieth century, medical advances led to people living longer and having better quality of life.” (*responds to the prompt with a minimally acceptable claim that establishes a line of reasoning*)

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 4 — Long-Essay Question (continued)

Examples of an unacceptable thesis (hypothetical)

- “The period after 1900 was one in which scientific progress quickened considerably.” (*offers a historically defensible claim, but includes no additional information beyond what is provided in the introductory statement and no indication of a line of reasoning*)
- “The spread of new communication technologies in the twentieth century meant that governments could no longer control what their citizens read, said, or did. (*not a historically defensible claim*)
“New technologies like smart phones help everyone connect better, like social media.” (*does not respond directly to the prompt because there is no clear link to twentieth-century scientific advances or effects.*)

B. Contextualization (0–1 points)

Responses earn **one** point by describing a broader historical context relevant to the prompt. To earn this point, the response must relate the topic of the prompt to broader historical events, developments, or processes that occurred before, during, or continued after the time frame of 1900 to 2001. This point is not awarded for merely a phrase or a reference.

To earn the point, the essay must accurately describe a context relevant to how advances in science and technology affected society in the period 1900 to 2001.

Example of acceptable contextualization (hypothetical):

- “The Second Industrial Revolution resulted in a much wider array of consumer goods, at prices that more and more people could afford.” (*relates broader events and developments to the topic*)

Examples of unacceptable contextualization (hypothetical):

- “The printing press had existed long before 1900.” (*potentially relevant, but is merely a reference and does not meet the requirement of “describe”*)
- “Galileo and Newton developed theories that transformed physics in the period from 1600 to 1800.” (*potentially relevant, but has no clear link to the social effects of twentieth-century advances in science and technology*)

C. Evidence (0–2 points)

Evidence

Responses earn **one** point by providing at least two specific examples of evidence relevant to the **topic** of the prompt. Responses can earn this point without earning the point for a thesis statement. To earn this point, the response must identify specific historical examples of evidence relevant to the topic of how advances in science and technology affected society in the period 1900 to 2001. These examples of evidence must be different from the information used to earn the point for contextualization.

Typically, statements credited as **contextualization** will be more general statements that place an argument or a significant portion of it in a broader context. Statements credited as **evidence** will typically be more specific information.

General assertions containing no specific information beyond what is provided in the introductory statement should not be credited as “specific historical examples.”

AP[®] WORLD HISTORY

2018 SCORING GUIDELINES

Question 4 — Long-Essay Question (continued)

Example of a statement that counts toward earning one point for evidence (hypothetical):

- “The development of new crops through the Green Revolution greatly decreased starvation during the late twentieth century.” *(counts toward earning the point because there is a specific historical example relevant to the prompt)*

Example of a statement that does not count toward earning one point for evidence (hypothetical):

- “During the late twentieth century a whole host of new technologies transformed social structures.” *(does not count toward earning the point because there is no specific information beyond what is provided in the introductory statement)*

OR

Supports an Argument

Responses earn **two** points if they support an **argument** in response to the prompt using specific and relevant examples of evidence. To earn the second point, the response must use specific historical evidence to support an argument regarding how advances in science and technology affected society in the period 1900 to 2001.

Example of successfully supporting an argument with evidence:

- “During the twentieth century, increased human production and economic growth through scientific and technological innovation led to greater environmental changes in the world. For example, the massive expansion of factory production and global shipping has increased the use of fossil fuels, which can cause climate change.” *(uses multiple, specific pieces of evidence in accurate support of an argument that addresses the prompt)*

D. Analysis and Reasoning (0–2 points)

Historical Reasoning

Responses earn **one** point by using a historical-reasoning skill to frame or structure an argument about how advances in science and technology affected society in the period 1900 to 2001. To earn this point, the response must demonstrate the use of historical reasoning to frame or structure an argument, although the reasoning might be uneven, imbalanced, or inconsistent.

Examples of using historical reasoning might include:

- Explaining how medical and agricultural innovations led to longer human lives and increased populations
- Explaining the negative environmental effects of increasing industrial productivity or easier/ faster travel and communications
- Explaining the effects of scientific and technological change on social norms and categories (for example, changing gender and family norms, changing views of gender and gender roles)
- Explaining the effects of scientific and technological change on culture and/or belief systems (e.g. globalization)

2018 SCORING GUIDELINES

Question 4 — Long-Essay Question (continued)

Complexity

Responses earn **two** points by demonstrating a complex understanding of how advances in science and technology affected society in the period 1900 to 2001 by using evidence to corroborate, qualify, or modify an argument that addresses the question.

Demonstrating complex understanding might include:

- Explaining the nuance of an issue by analyzing multiple factors or by considering diverse or alternative perspectives or evidence, such as constructing an argument that scientific and technological advances have, on the one hand, helped bridge old economic, social and cultural divides while, on the other hand, opening new divides and creating new antagonisms and inequalities.
- Qualifying or modifying the main argument of the essay to demonstrate awareness of historical complexity, such as constructing an argument that explains how, despite its immense social benefits, the Green Revolution has brought some unintended negative consequences, such as overreliance on genetically modified seeds, greater pesticide use, and increased pressure on ecosystems around the world.
- Explaining relevant and insightful connections across time and space, such as explaining how the effects of 20th century medical innovations were very different in developing versus developed societies. In developed societies, lifestyle illnesses like diabetes and heart disease are predominate; while in developing countries infectious diseases are still quite prevalent.
