Directions:

Today, you will take the Grade 4 Mathematics Practice Test. If you do not know the answer to a question, you may go on to the next question. When you finish, you may review your answers and any questions you did not answer.

- For questions with bubbled responses, fill in the circle next to your answer choice. If you change your answer, make sure you erase your old answer completely. Do not cross out or make any marks on the other choices.
- For questions with response boxes, write your answer neatly, clearly, and in the space provided.
- For questions with response grids, write your answer in the answer boxes at the top of the grid.

- Write only one digit or symbol in each answer box.
- Use only the options listed below each box.
- Be sure to write a fraction bar or decimal point in the answer box if it is a part of the answer.
- You can record a mixed number in several different ways. You can write it as:
